Time On Our Side Why We All Need A Shorter Working Week:

Time on Our Side Anna Coote, Jane Franklin, 2013 Have you ever wondered why you're so busy where your time goes or how much your time is really worth Authored by leading experts in social economic and environmental sciences this book will radically alter your understanding of the nature and value of time Inventing the Future Nick Srnicek, Alex Williams, 2015-10-13 Neoliberalism isn't working Austerity is forcing millions into poverty and many more into precarious work while the left remains trapped in stagnant political practices that offer no respite Inventing the Future is a bold new manifesto for life after capitalism Against the confused understanding of our high tech world by both the right and the left this book claims that the emancipatory and future oriented possibilities of our society can be reclaimed Instead of running from a complex future Nick Srnicek and Alex Williams demand a postcapitalist economy capable of advancing standards liberating humanity from work and developing technologies that expand our freedoms This new edition includes a new chapter where they respond to their various critics **The Politics of Time** Guy Standing, 2023-10-26 Guy Standing's books have over the years pieced together a necessary political and intellectual agenda His Politics of Time is a splendid and timely addition to this body of important work Yanis Varoufakis Time has always been political Throughout history how we use our time has been defined and controlled by the powerful and today is no exception But we can reclaim control and in this book the pioneering economist Guy Standing shows us how The ancient Greeks organised time into five categories work labour recreation leisure and contemplation Labour was onerous whereas leisure was *scholē* and included participation in public life and lifelong education Since the industrial revolution our time has been shaped by capitalism our jobs are supposed to provide all meaning in life our time outside labour is considered simply time off and politicians prioritise jobs above all other aspects of a good life Today we are experiencing the age of chronic uncertainty Mental illness is on the rise some people are experiencing more time freedom while many others are having more and more of their time stolen from them particularly the vulnerable and those in the precariat But there is a way forward We can create a new politics of time one that liberates us and helps save the planet through strengthening real leisure and working together through commoning We can retake control of our time but we must do it together Post-Growth Living Kate Soper, 2020-11-10 An urgent and passionate plea for a new and ecologically sustainable vision of the good life The reality of runaway climate change is inextricably linked with the mass consumerist capitalist society in which we live And the cult of endless growth and endless consumption of cheap disposable commodities isn't only destroying the world it is damaging ourselves and our way of being How do we stop the impending catastrophe and how can we create a movement capable of confronting it head on In Post Growth Living philosopher Kate Soper offers an urgent plea for a new vision of the good life one that is capable of delinking prosperity from endless growth Instead she calls for a renewed emphasis on the joys of being one that is capable of collective happiness not in consumption but by creating a future that allows not only for more free time and less conventional and more creative ways

of using it but also for more fulfilling ways of working and existing This is an urgent and necessary intervention into debates on climate change

Work in the Future Robert Skidelsky, Nan Craig, 2020-03-22 This short accessible book seeks to explore the future of work through the views and opinions of a range of expertise encompassing economic historical technological ethical and anthropological aspects of the debate The transition to an automated society brings with it new challenges and a consideration for what has happened in the past the editors of this book carefully steer the reader through future possibilities and policy outcomes all the while recognising that whilst such a shift to a robotised society will be a gradual process it is one that requires significant thought and consideration

Whatever Happened to the Leisure Society? A. J. Veal, 2018-10-10 The idea of a leisure society was in its heyday in the 1960s and 1970s when it was predicted that the pattern of falling working hours which had been experienced in Western societies in the first half of the twentieth century would continue indefinitely The leisure society has clearly not been realised On the contrary contemporary industrial societies seem to be characterised by a shortage of time experienced as time squeeze and stress The leisure society idea can be seen as the modern version of the age old dream of a life of ease and plenty This analytically and empirically rich book traces the idea in history through biblical classical Greek medieval and nineteenth century utopian writings and into twentieth century concerns with dystopia and the impact of rapid technological change The leisure society concept turns out to have been an elusive and short lived phenomenon For a variety of reasons the trend towards shorter working hours ran out of steam in the last quarter of the twentieth century However while leisure scholars have deserted the topic a diverse range of activists including environmentalists economists and feminists continue to make the case for reducing working hours Whatever Happened to the Leisure Society concludes that the on going struggle for time should be supported for the sake of human health and well being and for the sake of the planet This is a valuable resource for students and academics in the fields of leisure studies cultural studies history economics sociology and political science

Labour Law and Economic Policy Adrián Todolí-Signes, 2024-02-22 This book studies labour institutions from an economic perspective to justify their existence and the advantages that they bring to innovation efficiency productivity and economic growth The philosophical foundations of labour law rely on the protection of the weaker party of the employment contract However after 40 years of political neoliberalism these justifications seem insufficient for achieving progress in the area of labour and employment rights This book changes the narrative of why we need labour standards It begins with a study of the reasons that gave rise to labour law in the context of the Industrial Revolution and its evolution and moves on to analyse the current context dominated by globalisation and economic digitisation It then proceeds to study the main justifications for intervention in the labour market in the current business economic context on a global scale economic growth pre distribution of wealth a meritocratic allocation of working conditions and equality among workers Using case studies and examples from across the EU the UK and the US the book shows how the deregulation of labour markets harms innovation and the economy especially

when considering the challenges of platform work algorithms and AI It demonstrates that labour standards such as the minimum wage sectoral collective bargaining and collective rights protection against dismissal and discrimination occupational risk prevention and social security are necessary for the economy to function properly
