Consumer Tribes Avi

Shankar, Bernard Cova, Robert Kozinets, 2012-06-25 Marketing and consumer research has traditionally conceptualized consumers as individuals who exercise choice in the marketplace as individuals not as a class or a group. However, an important new perspective is now emerging that rejects the individualistic view and focuses on the reality that human life is essentially social and that who we are is an inherently social phenomenon. It is the tribes, the many little groups we belong to that are fundamental to our experience of life. Tribal Marketing shows that it is not individual consumption of products that defines our lives but rather that this activity actually facilitates meaningful social relationships. The social links, social relationships are more important than the things, brands etc. The aim of this book is therefore to offer a systematic overview of the area that has been defined as cultures of consumption, consumption microcultures, brand cultures, brand tribes and brand communities. It is through these that students of marketing and marketing practitioners can begin to genuinely understand the real drivers of consumer behaviour. It will be essential to everyone who needs to understand the new paradigm in consumer research, brand management and communications management. *Sustainable Culinary Systems* C. Michael Hall, Gossling Stefan, 2013-01-04 There is increasing public and academic interest in local and sustainable foods and food tourism. These interests have been reflected in such diverse elements as the growth of farmers' markets, green restaurants, food miles, carbon and sustainability labelling, concerns over food supply and security, Slow Food, Fair Trade and a desire to buy and eat locally. Food-related hospitality and tourism is integral to this process because of the way in which it simultaneously acts to globalise and localise food consumption and create new foodways and commodity chains. This book therefore aims to provide an integrated understanding of the contemporary interest in food and food tourism through the use of an international collection of illustrative case study chapters as well as the provision of a novel integrative framework for the book, a sustainable culinary system. This is the first volume to examine the concept of sustainable culinary systems particularly with specific reference to tourism and hospitality. Divided into two parts, firstly the notion of the local is explored reflecting the increased interest in the championing of local food production and consumption. Secondly, treatment of sustainability in food and food tourism and hospitality in settings that reach beyond the local in a business and socio-economic sense is reviewed. The book therefore reflects much of the contemporary public interest in the conscious or ethical consumption and production of food as well as revealing the inherent tensions between local and broader goals in both defining and achieving sustainable culinary systems and the environmental, social and economic implications of food production and consumption. This book provides the reader with an integrated approach to understanding the subject of how culinary systems may be made more sustainable and will be valuable reading to all those interested in sustainable food and food tourism. **From Chinese Brand Culture to Global Brands** W. Zhiyan, J. Borgerson, J. Schroeder, 2013-10-08 *From Chinese Brand Culture to Global Brands* examines branding from the Chinese perspective and predicts that China's greatest brands are poised for global dominance. Islamic Finance in Europe Valentino Cattelan, 2013-01-01 Highlighting the impact

of current globalization on financial markets this topical book challenges the universality of Western property rights and interprets Islamic finance in Europe as part of a plural financial system where different conceptions of economic justice co-exist and influence each other. The contributing authors analyse key economic development and social integration issues from an Islamic perspective and outline the European approach to accommodating Islamic finance with particular regard to the peculiarities of individual nation states. Set in this context the book presents financial pluralism as a device to enhance a level playing field in the global marketplace as well as to foster a plural open society. Providing a comprehensive and methodological guide to Islamic finance in Europe this book will prove an illuminating and informative read for academics, students and policymakers with an interest in the impact on financial regulation of an increasingly globalized world.
