Phenomenon Christoph Lindner, 2003 Shanghai long known as mainland China's most cosmopolitan city is today a global cultural capital This book offers the first in depth examination of contemporary Shanghai based art and design from state sponsored exhibitions to fashionable cultural complexes to cutting edge films and installations Informed by years of in situ research the book looks beyond contemporary art's global hype to reveal the socio political tensions accompanying Shanghai's transitions from semi colonial capitalism to Maoist socialism to Communist Party sponsored capitalism Case studies reveal how Shanghai's global aesthetic constructs glamorising artifices that mask the conflicts between vying notions of foreign influenced modernity and anti colonialist nationalism as well as the city's repressed socialist past and its consumerist present

Cyberpop Sidney Eve Matrix, 2013-05-13 Cyberpop is an analysis of cyberculture and its popular cultural productions The study begins with a Foucaultian model of cyberculture as a discursive formation and explains how some key concepts such as virtuality speed and Connectivity operate as a conceptual architecture network linking technologies to information and individual subjects The chapters then each focus on a particular cyberfiguration including Hollywood films GATTACA The Matrix popular literature William Gibson's Neuromancer Scott Westerfeld's Polymorph advertising for digital products and

services Apple Computer's 1984 McIntosh campaign AT T's mLife campaign digital artworks including virtual females such as Motorola's Mya and Elite Modeling Agency's Webbie Tookay and work by visual artist Daniel Lee for Microsoft's Evolution campaign and video games TombRaider Each close reading illustrates the ways in which representations of digital lifestyles and identities which typically fetishize computers and celebrate a high tech aesthetic encourage participation in digital capitalism and commodity cyberculture Matrix argues that popular representations of cyberculture often function as forms of social criticism that creatively inspire audiences to think different in the words of Mac advertising about the consequences of the digitalization of everyday life Virtual Globalization David Holmes,2002-11 This book examines the interrelationship between telecommunications and tourism in shaping the nature of space place and the urban at the end of the twentieth century They discuss how these agents are instrumental in the production of homogenous world spaces and how these in turn presuppose new kinds of political and cultural identity This work will be of essential interest to scholars and students in the fields of sociology geography cultural studies and media studies *Cyberfigurations* Sidney Eve Matrix,2003

Herman,Noam Chomsky,2002 A compelling indictment of the news media's role in covering up errors and deceptions The New York Times Book Review due to the underlying economics of publishing from famed scholars Edward S Herman and Noam Chomsky With a new introduction In this pathbreaking work Edward S Herman and Noam Chomsky show that contrary to the usual image of the news media as cantankerous obstinate and ubiquitous in their search for truth and defense of justice in their actual practice they defend the economic social and political agendas of the privileged groups that dominate domestic society the state and the global order Based on a series of case studies including the media's dichotomous

treatment of worthy versus unworthy victims legitimizing and meaningless Third World elections and devastating critiques of media coverage of the U S wars against Indochina Herman and Chomsky draw on decades of criticism and research to propose a Propaganda Model to explain the media s behavior and performance Their new introduction updates the Propaganda Model and the earlier case studies and it discusses several other applications These include the manner in which the media covered the passage of the North American Free Trade Agreement and subsequent Mexican financial meltdown of 1994 1995 the media s handling of the protests against the World Trade Organization World Bank and International Monetary Fund in 1999 and 2000 and the media s treatment of the chemical industry and its regulation What emerges from this work is a powerful assessment of how propagandistic the U S mass media are how they systematically fail to live up to their self image as providers of the kind of information that people need to make sense of the world and how we can understand their function in a radically new way *Biennial Exhibition* ,2006 **Thinking Otherwise** David J. Gunkel,2007 Thinking Otherwise is a unique and revealing look at the philosophical dimensions of information and communication technology ICT Among thinkers the importance of what transpires within the virtual world is the effect these activities have on real human beings who exist outside of and beyond the computer generated virtual environment Obviously the result of ICT interactions can lead to good or bad outcomes Gunkel however is not concerned about deciding which argument is more compelling but how these arguments are organised articulated and configured This approach entails challenging criticizing and even changing the terms and conditions of the discourse itself For example the binary nature of computer logic tends to colour debate about subsequent issues by portraying each side as the antithesis of the other That is the switch is turned on or off Thinking Otherwise investigates the unique quandaries complications and possibilities introduced by a form of otherness that veils through technology the identity of the Other Therefore Gunkel formulates alternative ways of proceeding to take into account additional forms of otherness Gunkel submits traditional forms of philosophical reasoning to a critical reevaluation caused by opportunities made available with information technology and also develops alternative ways of thinking that are oriented otherwise The New Media Theory Reader Robert Hassan,Julian Thomas,2006-09 The study of new media opens up some of the most fascinating issues in contemporary culture bringing together key readings on new media what it is where it came from how it affects our lives and how it is managed It encourages readers to pay attention to the new in new media as well as consider it as a historical phenomenon

Communication, Media, and American Society Daniel W. Rossides,2003 What is the role of communication technology and media in making American society more adaptive equitable and democratic Analyzing the field of communication against an in depth picture of American society this provocative wide ranging text explores how communication enterprises are intrinsically linked to the establishment and maintenance of social power Throughout the book changes in communication capabilities are related to changes in wealth and income distribution the structures of

economic organizations work and the professions minorities law and government urbanization popular culture and globalization In an engaging narrative the author presents empirical evidence that suggests that popular beliefs about the democratic role of media and communications often are misguided While we are in an information age it is not an information revolution that can liberate society Emphasizing new technologies and media in contemporary American society Rossides shows how most forms of social communication throughout history language gestures clothing buildings and spaces ships and railroads have sustained social power
