Shadows Bright as Glass Amy Ellis Nutt,2011-04-05 On a sunny fall afternoon in 1988 Jon Sarkin was playing golf when without a whisper of warning his life changed forever As he bent down to pick up his golf ball something strange and massive happened inside his head part of his brain seemed to unhinge to split apart and float away For an utterly inexplicable reason a tiny blood vessel thin as a thread deep inside the folds of his gray matter had suddenly shifted ever so slightly rubbing up against his acoustic nerve Any noise now caused him excruciating pain After months of seeking treatment to no avail in desperation Sarkin resorted to radical deep brain surgery which seemed to go well until during recovery his brain began to bleed and he suffered a major stroke When he awoke he was a different man Before the stroke he was a calm disciplined chiropractor a happily married husband and father of a newborn son Now he was transformed into a volatile and wildly exuberant obsessive seized by a manic desire to create art devoting virtually all his waking hours to furiously drawing painting and writing poems and letters to himself

strangely detached from his wife and child and unable to return to his normal working life His sense of self had been shattered his intellect intact but his way of being drastically altered His art became a relentless quest for the right words and pictures to unlock the secrets of how to live this strange new life And what was even stranger was that he remembered his former self In a beautifully crafted narrative award winning journalist and Pulitzer Prize finalist Amy Ellis Nutt interweaves Sarkin s remarkable story with a fascinating tour of the history of and latest findings in neuroscience and evolution that illuminate how the brain produces from its web of billions of neurons and chaos of liquid electrical pulses the richness of human experience that makes us who we are Nutt brings vividly to life pivotal moments of discovery in neuroscience from the shocking rebirth of a young girl hanged in 1650 to the first autopsy of an autistic savant s brain and the extraordinary true stories of people whose personalities and cognitive abilities were dramatically altered by brain trauma often in shocking ways Probing recent revelations about the workings of creativity in the brain and the role of art in the evolution of human intelligence she reveals how Jon Sarkin s obsessive need to create mirrors the earliest function of art in the brain Introducing major findings about how our sense of self transcends the bounds of our own bodies she explores how it is that the brain generates an individual self and how if damage to our brains can so alter who we are we can nonetheless be said to have a soul For Jon Sarkin with his personality and sense of self permanently altered making art became his bridge back to life a means of reassembling from the shards of his former self a new man who could rejoin his family and fashion a viable life He is now an acclaimed artist who exhibits at some of the country s most prestigious venues as well as a devoted husband to his wife Kim and father to their three children At once wrenching and inspiring this is a story of the remarkable human capacity to overcome the most daunting obstacles and of the extraordinary workings of the human mind *Crossroads* Tommy Rhys Andrews,2019-10-23 Dreams reality memories false memories past lives and space time These are all relative factors when you enter this realm of impossible possibilities While this book contains over five hundred pieces of literature the writings look at multiple debatable topics whilst taking a humorous approach to tackling issues that surround many occurrences As the journey of understanding and knowledge expansion continues it becomes obvious that the road isn t easy especially when there are glitches The final battle is never an easy one Travel along this journey at your own risk if you dare The Big Nest Originated the Big Bang of Stephen Hawking'S Black Holes William Moreira,2013-08-01 Author William Moreira has spent decades studying and seeking God sometimes while flying high above the clouds in his Cessna In that time he has discovered that God is everywhere Now in this new study he takes issue with Stephen Hawking and other scientists and individuals who argue against Gods existence He seeks to disprove their theories and contemplates ways you can use your brain to discover the true nature of the universe live in a manner that will lead to a happy place in eternity and argue against the theories of Hawking and his constituents While some aspects of the universe will remain a mystery its clear that God exists Whats more its up to you to find the right path to moral evolution You must look at the infinity of the illuminated dark matter encrusted

within the stars and in exaltation accept that there is a super power and that God is everywhere Join Moreira as he takes on various foolish views about the universe and existence You can find faith understanding and the knowledge needed to live a more fulfilling life with The Big Nest Originated the Big Bang of Stephen Hawkings Black Holes
