Nature X Nature of Everything Albert Michelutti, 2014-02-13 As Albert Einstein lay on his death bed he asked for his glasses his writing implements and his latest equations He knew he was dying yet he continued to work In those final hours of his life while fading in and out of consciousness he was working on what he hoped would be the greatest work of all It was a project of monumental complexity It was a project that he hoped would unlock the mind of God Friedrich Engels and the Dialectics of Nature Kaan Kangal, 2020-01-27 Reading different or controversial intentions into Marx and Engels works has been a common but somewhat unquestioned practice in the history of Marxist scholarship Engels Dialectics of Nature a torso for some and a great book for others is a case in point The entire Engels debate separates into two opposite views Engels the contaminator of Marx's new materialism vs Engels the self educated genius of dialectical materialism What Engels unlike Marx has not enjoyed so far is a critical reading that considers the relationship between different layers of this standard text authorial textual editorial and interpretational Informed by a historical hermeneutic this book questions the elements that structure the debate on the Dialectics of Nature It analyzes different political and philosophical functions attached to Engels text and relocates the meaning of the term dialectics into a more precise context Arguing that Engels dialectics is less complete than we usually think it is but that he achieved more than most scholars would like to admit this book fully documents and critically analyzes Engels intentions and concerns in the Dialectics of Nature the process of writing and its reception and edition history in order to reconstruct the solved and unsolved philosophical problems in this unfinished work **Look and Learn: Let's Explore Opposites** Pasquale De Marco, 2025-07-14 In a world brimming with contrasts
