What Intellectual History:

What is Intellectual History? Richard Whatmore, 2016-05-18 What is intellectual history Those who practice intellectual history have described themselves as eavesdroppers upon the conversations of the past explorers of alien ideological worlds and translators between historic societies and our own while their critics have often derided them as narrow minded studying the ideas of dead white men Some consider the discipline to be among the most important in the humanities and social sciences because it facilitates a better understanding of contemporary ideological programmes and facilitates their rational evaluation In this engaging and refreshing introduction to the field Richard Whatmore begins by examining the historical development of intellectual history before dissecting its various methodological debates He presents various alternative ways in which we should think about intellectual history as well as presenting his own very clear definition of the field Drawing on a wide range of historical examples Whatmore shows how ideas philosophical political religious scientific artistic originated in their historical context and how they were both shaped by and helped to shape the societies in which they originated He ends by casting a critical eye over the current state of intellectual history and a brief discussion of how it might develop in the future What is Intellectual History will become an essential textbook for scholars and students of intellectual history philosophy politics and the humanities

Global Intellectual History Samuel Moyn, Andrew Sartori, 2013-06-25 Where do ideas fit into historical accounts that take an expansive global view of human movements and events Teaching scholars of intellectual history to incorporate transnational perspectives into their work while also recommending how to confront the challenges and controversies that may arise this original resource explains the concepts concerns practice and promise of global intellectual history featuring essays by leading scholars on various approaches that are taking shape across the discipline The contributors to Global Intellectual History explore the different ways in which one can think about the production dissemination and circulation of global ideas and ask whether global intellectual history can indeed produce legitimate narratives They discuss how intellectuals and ideas fit within current conceptions of global frames and processes of globalization and proto globalization and they distinguish between ideas of the global and those of the transnational identifying what each contributes to intellectual history A crucial guide this collection sets conceptual coordinates for readers eager to map an emerging area of study

The Descent of Ideas Donald R. Kelley, 2002 The history of ideas better known these days as intellectual history is a flourishing field of study which has been the object of much controversy but hardly any historical exploration This major new work from Donald R Kelley is the first comprehensive history of intellectual history tracing the study of the history of thought from ancient medieval and early modern times its emergence as the history of ideas in the 18th century and its subsequent expansion The point of departure for this study is the perspective opened up by Victor Cousin in the early 19th century on Eclecticism and its association with the history of philosophy established by Renaissance scholars Kelley considers a broad range of topics including the rivalry

between ideas and language the rise of cultural history the contributions of certain 19th and 20th century practitioners of the history of ideas in interdisciplinary areas of philosophy literature and the sciences and finally the current state of intellectual history The central theme of the book is the interplay between the canon of philosophical thought and the tradition of language and textual study the divergence of the latter marking the descent of ideas into the realm of cultural history

A Companion to Intellectual History Richard Whatmore, Brian Young, 2015-11-06 A Companion to Intellectual History provides an in depth survey of the practice of intellectual history as a discipline Forty newly commissioned chapters showcase leading global research with broad coverage of every aspect of intellectual history as it is currently practiced Presents an in depth survey of recent research and practice of intellectual history Written in a clear and accessible manner designed for an international audience Surveys the various methodologies that have arisen and the main historiographical debates that concern intellectual historians Pays special attention to contemporary controversies providing readers with the most current overview of the field Demonstrates the ways in which intellectual historians have contributed to the history of science and medicine literary studies art history and the history of political thought Named Outstanding Academic Title of 2016 by Choice Magazine a publication of the American Library Association The Descent of Ideas Donald R.

Kelley, 2017-09-29 The history of ideas better known these days as intellectual history is a flourishing field of study which has been the object of much controversy but hardly any historical exploration This major new work from Donald R Kelley is the first comprehensive history of intellectual history tracing the study of the history of thought from ancient medieval and early modern times its emergence as the history of ideas in the 18th century and its subsequent expansion The point of departure for this study is the perspective opened up by Victor Cousin in the early 19th century on Eclecticism and its association with the history of philosophy established by Renaissance scholars Kelley considers a broad range of topics including the rivalry between ideas and language the rise of cultural history the contributions of certain 19th and 20th century practitioners of the history of ideas in interdisciplinary areas of philosophy literature and the sciences and finally the current state of intellectual history The central theme of the book is the interplay between the canon of philosophical thought and the tradition of language and textual study the divergence of the latter marking the descent of ideas into the realm of cultural history

Intellectual History of Economic Normativities Mikkel Thorup, 2016-06-20 The book investigates the many ways that economic and moral reasoning interact overlap and conflict both historically and at present The book explores economic and moral thinking as a historically contingent pair using the concept of economic normativities The contributors use case studies including economic practices such as trade and finance and tax and famine reforms in the British colonies to explore the intellectual history of how economic and moral issues interrelate Rethinking Modern European Intellectual History Darrin M. McMahon, Samuel Moyn, 2014-03 This book is a collection of essays by leading practitioners of modern European intellectual history reflecting on the theoretical and methodological underpinnings of the field The essays each attempt to

assess their respective disciplines giving an account of their development and theoretical evolution while also reflecting on current problems challenges and possibilities *The ^AWorlds of American Intellectual History* Joel Isaac,James T. Kloppenberg,Michael O'Brien,Jennifer Ratner-Rosenhagen,2016-11-15 The Worlds of American Intellectual History follows American thinkers and their ideas as they have crossed national institutional and intellectual boundaries The volume explores ways in which American ideas have circulated in different cultures It also examines the multiple sites from social movements museums and courtrooms to popular and scholarly books and periodicals in which people have articulated and deployed ideas within and beyond the borders of the United States *Conceptions of Space in Intellectual History* Daniel S. Allemann,Anton Jäger,Valentina Mann,2020-06-09 This volume takes a fresh approach to the issue of space in intellectual history and puts forward novel ways of rendering conceptions of space useful for historians of political thought Notions of space have become increasingly important to the practice of intellectual historians in recent years This is evidenced by emerging locutions such as the international turn global intellectual history and political space Thus far however it is still unclear what it actually means to take space seriously in intellectual history and what we might gain from doing so Ranging from the early modern period to the twentieth century the contributions to this volume span a variety of diverse topics and showcase the rewards of a spatial focus in intellectual history both as a kind of place and as an organising principle The book reconstructs the role of the modern territorial state in grounding reflection on political legitimacy the interface between oceans and empires as a source of political reflection and the curious antecedents of today s spatial turn in German and Indian visions of geopolitics in the interwar years In doing so it makes a contribution to an ever growing field This book was originally published as a special issue of Global Intellectual History **Ideas in Time** John Potts,2021-10-13 Ideas In Time deals extensively with the history of ideas The aims of the book are to provide a coherent theoretical account of the ill defined field known as the history of ideas to emphasise the longue dur e or long view in intellectual and cultural history to develop a reconfigured history of ideas **The Place of Magic in the Intellectual History of Europe ...** Lynn Thorndike,1905 **Intellectual History** Mikkel Thorup,2013-05 The 5 Questions series format is to ask five questions linking personal experience with scholarly work not because there is any deep or global truth in biography but because scientific disciplines their research and methods are also inherently historical and contingent A way to approach the question of what intellectual history is and how it can and should be made is personal institutional professional and disciplinary going from the most individual to the greatest material and ideational changes in politics society and university By linking the questions of the personal exposure to intellectual history with reflections on both one s own work and the state of our discipline we hope to provoke scholarly self reflective thought as well as provide a little bit of material to the grander tale of intellectual history Interviews with Carlos Altamirano Terrence Ball Duncan Bell Mark Bevir Warren Breckman Roger Chartier Vincenzo Ferrone Michael Friedman Carlo Ginzburg Jacques Le Goff Hans Ulrich Gumbrecht Knud Haakonssen

Modern European Intellectual History Dominick LaCapra, Steven L. Kaplan, 1982 **Intellectual History: The philosophy of intellectual history** Richard Whatmore, 2015 **American Labyrinth** Raymond Haberski, Jr., Andrew Hartman, 2018-12-15 American Labyrinth contains a stimulating and useful collection of essays by historians reflecting on American intellectual history As a whole the book convinces the reader that the field of intellectual history is enjoying a renaissance The book will be especially prized by intellectual historians but historians of many different persuasions will find these essays rewarding too Choice Intellectual history has never been more relevant and more important to public life in the United States In complicated and confounding times people look for the principles that drive action and the foundations that support national ideals American Labyrinth demonstrates the power of intellectual history to illuminate our public life and examine our ideological assumptions This volume of essays brings together 19 influential intellectual historians to contribute original thoughts on topics of widespread interest Raymond Haberski Jr and Andrew Hartman asked a group of nimble sharp scholars to respond to a simple question How might the resources of intellectual history help shed light on contemporary issues with historical resonance The answers all rigorous original and challenging are as eclectic in approach and temperament as the authors are different in their interests and methods Taken together the essays of American Labyrinth illustrate how intellectual historians operating in many different registers at once and ranging from the theoretical to the political can provide telling insights for understanding a public sphere fraught with conflict In order to understand why people are ready to fight over cultural symbols and political positions we must have insight into how ideas organize enliven and define our lives Ultimately as Haberski and Hartman show in this volume the best route through our contemporary American labyrinth is the path that traces our practical and lived ideas *The Worlds of American Intellectual History* Joel Isaac, James T. Kloppenberg, Michael O'Brien, Jennifer Ratner-Rosenhagen, 2017 The Worlds of American Intellectual History follows American thinkers and their ideas as they have crossed national institutional and intellectual boundaries The volume explores ways in which American ideas have circulated in different cultures It also examines the multiple sites from social movements museums and courtrooms to popular and scholarly books and periodicals in which people have articulated and deployed ideas within and beyond the borders of the United States *European Intellectual History from Rousseau to Nietzsche* Frank M. Turner, 2015-02-12 One of the most distinguished cultural and intellectual historians of our time Frank Turner taught a landmark Yale University lecture course on European intellectual history that drew scores of students over many years His lectures lucid accessible beautifully written and delivered with a notable lack of jargon distilled modern European history from the Enlightenment to the dawn of the twentieth century and conveyed the turbulence of a rapidly changing era in European history through its ideas and leading figures Richard A Lofthouse one of Turner's former students

has now edited the lectures into a single volume that outlines the thoughts of a great historian on the forging of modern European ideas Moreover it offers a fine example of how intellectual history should be taught rooted firmly in historical and biographical evidence **A History of American Literature ...: 1607-1676** Moses Coit Tyler,1881 **Studies in Intellectual History** George Boas,2020-02-03 This volume gathers work by Harold Cherniss George Boas Ludwig Edelstein Leo Spitzer and others *History of Intellectual Development* John Beattie Crozier,1901
