on the Sacred Scriptures ,1730 **The Spirit of Man** Robert Bridges,1927 *Life in Words* Jill Mann,2014-05-27 This volume collects fifteen landmark essays published over the last three decades by the distinguished medievalist Jill Mann Bringing together her essays on Chaucer the Gawain poet and Malory the collection foregrounds the common interest in the semantic implications of key vocabulary such as authority adventure and price that links them together Mann one of the finest critics of Middle English literature in her generation uses the concepts suggested by the language of medieval literature itself as a way into the masterpieces of Middle English including *The Canterbury Tales* *Troilus and Criseyde* *Sir Gawain and the Green Knight* and *The Morte Darthur* An extended introduction by Mark Rasmussen brings out the nature of the themes that run through the collection analyses the critical methods in play and assesses their significance in the context of Middle English studies over the last thirty years Signs of the Times, and Doctrinal Advocate and Monitor ,1897

NOBLE,1876 *A Century of Gospel-work* William Francis Pringle Noble,1876 *American Environmentalism* J. Michael Martinez,2013-06-20 Protecting the natural environment and promoting sustainability have become important objectives but achieving such goals presents myriad challenges for even the most committed environmentalist *American Environmentalism Philosophy History and Public Policy* examines whether competing interests can be reconciled while developing consistent coherent effective public policy to regulate uses and

protection of the natural environment without destroying the national economy It then reviews a range of possible solutions The book delves into key normative concepts that undergird American perspectives on nature by providing an overview of philosophical concepts found in the western intellectual tradition the presuppositions inherent in neoclassical economics and anthropocentric human centered and biocentric earth centered positions on sustainability It traces the evolution of attitudes about nature from the time of the Ancient Greeks through Europeans in the Middle Ages and the Renaissance the Enlightenment and the American Founders the nineteenth and twentieth centuries and up to the present Building on this foundation the author examines the political landscape as non governmental organizations NGOs industry leaders and government officials struggle to balance industrial development with environmental concerns Outrageous claims silly misrepresentations bogus arguments absurd contentions and overblown prophesies of impending calamities are bandied about by many parties on all sides of the debate industry spokespeople elected representatives unelected regulators concerned citizens and environmental NGOs alike In lieu of descending into this morass the author circumvents the silliness to explore the crucial issues through a more focused disciplined approach Rather than engage in acrimonious debate over minutiae as so often occurs in the context of green claims he recasts the issue in a way that provides a cohesive look at all sides This effort may be quixotic but how else to cut the Gordian knot

Marvell's Ambivalence Takashi Yoshinaka, 2011 A fresh reading of Marvell's most important works exploring the variety and complexity of his approaches to contemporary religious and political events Andrew Marvell's celebrated poetic ambivalence to the philosophical political and religious controversies of mid seventeenth century England is the subject of this book which includes major new historical readings of his most important lyrics and political verse incorporating material from hitherto unpublished contemporary manuscripts It places the poetic imagination of Marvell and his contemporaries such as John Milton Henry Vaughan Abraham Cowley Margaret Cavendish William Davenant and Thomas Fairfax into the context of the turbulent public events of the time and demonstrates Marvell's hitherto unnoticed connection with the liberal rational and sceptical thinkers associated with the Great Tew circle It also argues that Marvell's middle way in theology is bound up with his ambivalence towards the Calvinist God Takashi Yoshinaka took his D Phil at the University of Oxford and is Professor of English in the Graduate School of Letters Hiroshima University
