This up to date book comprehensively covers all aspects of speech and music sound reinforcement. It is roughly divided into four sections. Section 2 deals with the fundamental classes of hardware that the modern engineer will use such as loudspeaker systems and components, microphones, mixers, amplifiers and signal processors. Special attention is given to digital techniques for system control and to audio signal analysis. Section 3 deals with the basics of system design from concept to final realization. It covers topics such as basic system type and speech intelligibility, site survey, user needs analysis and project management.
