Throwing Rocks at the Google Bus Douglas Rushkoff, 2017-06-06 Why doesn t the explosive growth of companies like Facebook and Uber deliver more prosperity for everyone What is the systemic problem that sets the rich against the poor and the technologists against everybody else When protesters shattered the windows of a bus carrying Google employees to work their anger may have been justifiable but it was misdirected The true conflict of our age isn t between the unemployed and the digital elite or even the 99 percent and the 1 percent Rather a tornado of technological improvements has spun our economic program out of control and humanity as a whole the protesters and the Google employees as well as the shareholders and the executives are all trapped by the consequences It s time to optimize our economy for the human beings it s supposed to be serving In this groundbreaking book acclaimed media scholar and author Douglas Rushkoff tells us how to combine the best of human nature with the best of modern technology Tying together disparate threads big data the rise of robots and AI the increasing participation of algorithms in stock market trading the gig economy the collapse of the eurozone

The Energized Workplace Perry Timms,2020-08-13 SHORTLISTED Business Book Awards 2021 HR Management Category Productivity is flatlining employee wellbeing is at an all time low and stress at an all time high Mental health issues are now the biggest single disability affecting the UK and are estimated to cost the economy 105bn each year Traditional company design structures and processes are making these issues worse and leading to unprecedented levels of staff burnout This not only impacts individual employees there is also a detrimental effect on overall company performance when employees can t perform to their full potential It is the responsibility of Organizational Development and HR professionals to address these issues urgently and redesign work to allow people to flourish and businesses to thrive Full of practical advice tips and tools The Energized Workplace provides a blueprint for how practitioners can redesign their organizations to support employees and ensure the business outperforms the competition It covers everything from why existing structures are causing business output to decline why traditional processes are holding organizations back and what the consequences of not addressing these design issues will mean for business including increased staff turnover a rise in employee absence

and a decline in company profits Including case studies from organizations across a range of sectors who have successfully put people at the heart of their workplace design such as CyberClick Mind Valley Brewdog and Wegmans and with specific guidance on designing for five generations working side by side across different countries and on separate time zones The Energized Workplace will help OD and HR professionals confidently tackle the organizational issues putting their company success and employee health and happiness in jeopardy This book is essential reading for practitioners needing to deal with the wellbeing crisis and productivity puzzle in the new world of work

The People Vs Tech Jamie Bartlett, 2018-04-05 From the bestselling author of The Dark Net comes a book that explains all the dangers of the digital revolution and offers concrete solutions on how we can protect our personal privacy and democracy itself The internet was meant to set us free But have we unwittingly handed too much away to shadowy powers behind a wall of code all manipulated by a handful of Silicon Valley utopians ad men and venture capitalists And in light of recent data breach scandals around companies like Facebook and Cambridge Analytica what does that mean for democracy our delicately balanced system of government that was created long before big data total information and artificial intelligence In this urgent polemic Jamie Bartlett argues that through our unquestioning embrace of big tech the building blocks of democracy are slowly being removed The middle class is being eroded sovereign authority and civil society is weakened and we citizens are losing our critical faculties maybe even our free will The People Vs Tech is an enthralling account of how our fragile political system is being threatened by the digital revolution Bartlett explains that by upholding six key pillars of democracy we can save it before it is too late We need to become active citizens uphold a shared democratic culture protect free elections promote equality safeguard competitive and civic freedoms and trust in a sovereign authority This essential book shows that the stakes couldn't be higher and that unless we radically alter our course democracy will join feudalism supreme monarchies and communism as just another political experiment that quietly disappeared

Stakeholder Capitalism Klaus Schwab, 2021-01-27 Reimagining our global economy so it becomes more sustainable and prosperous for all Our global economic system is broken But we can replace the current picture of global upheaval unsustainability and uncertainty with one of an economy that works for all people and the planet First we must eliminate rising income inequality within societies where productivity and wage growth has slowed Second we must reduce the dampening effect of monopoly market power wielded by large corporations on innovation and productivity gains And finally the short sighted exploitation of natural resources that is corroding the environment and affecting the lives of many for the worse must end The debate over the causes of the broken economy laissez faire government poorly managed globalization the rise of technology in favor of the few or yet another reason is wide open Stakeholder Capitalism A Global Economy that Works for Progress People and Planet argues convincingly that if we don't start with recognizing the true shape of our problems our current system will continue to fail us To help us see our challenges more clearly Schwab the Founder and Executive Chairman of the World Economic Forum looks for the real causes of our system's shortcomings and

for solutions in best practices from around the world in places as diverse as China Denmark Ethiopia Germany Indonesia New Zealand and Singapore And in doing so Schwab finds emerging examples of new ways of doing things that provide grounds for hope including Individual agency how countries and policies can make a difference against large external forces A clearly defined social contract agreement on shared values and goals allows government business and individuals to produce the most optimal outcomes Planning for future generations short sighted presentism harms our shared future and that of those yet to be born Better measures of economic success move beyond a myopic focus on GDP to more complete human scaled measures of societal flourishing By accurately describing our real situation Stakeholder Capitalism is able to pinpoint achievable ways to deal with our problems Chapter by chapter Professor Schwab shows us that there are ways for everyone at all levels of society to reshape the broken pieces of the global economy and country by country company by company and citizen by citizen glue them back together in a way that benefits us all **Tickling Sharks** John

Elkington,2024-04-09 Speaking Tomorrow s Truth to Power Sustainability is going mainstream but where did the story start For decades the traditional capitalist business model required growth at all costs Business as usual guaranteed unsustainability Now in contrast we see growing adoption of greener practices but where did these ideas come from and where are the linked movements headed Drawing on a half century of experience since the early seventies Godfather of Sustainability John Elkington explains how a series of societal pressure waves have helped to transform business markets and ultimately capitalism He explains how he came to tickle the human sharks of the corporate world encouraging them to embrace once unthinkable ways of addressing new social economic environmental and governance priorities John s candid memoir tracks his colorful journey through youthful misadventures and inspirations to his pioneering work making business sense of sustainability Written in a knowledgeable thoughtful and humorous voice this witness statement explains and criticizes progress to date before sketching a manifesto for those determined to make the global economy more responsible more resilient and crucially more regenerative *Connected Capitalism* David Weitzner,2021-04-13 Applying the classic

teachings of Judaism **Connected Capitalism** is an empowering call to fix what is currently broken in our social political and economic spaces **Social Catholicism for the Twenty-first Century?--Volume 2** William F. Murphy,2024-09-19 This rich collection of essays by distinguished scholars from across the globe can be read as sketching key steps on the path toward working in solidarity to build a future worthy of the human family through a new social Catholicism These steps include a contemporary renewal of Christian humanism and of human rights while learning to live as authentic Christian witnesses in pluralistic societies after the end of Christendom They will also include working for a just and sustainable economic paradigm becoming missionary disciples with a continual orientation toward the marginalized and overcoming the plague of racism by working to build a constitutional democracy for every citizen This societal renewal will require fostering robust movements of social Catholicism apt for our age within which Catholics will pursue the Universal Call to Holiness

through living their earthly vocations in a spirit of social friendship They will creatively employ social media to foster apostolates extending beyond borders In an age of dark clouds threatening dystopia a new social Catholicism will require a reinvigorated pastoral leadership that has come to appreciate the dangers of populism and the need to instead foster solidarity and incarnate Christian charity through a better kind of politics **Profit over Privacy** Matthew

Crain,2021-09-21 A deep dive into the political roots of advertising on the internet The contemporary internet s de facto business model is one of surveillance Browser cookies follow us around the web Amazon targets us with eerily prescient ads Facebook and Google read our messages and analyze our patterns and apps record our every move In Profit over Privacy Matthew Crain gives internet surveillance a much needed origin story by chronicling the development of its most important historical catalyst web advertising The first institutional and political history of internet advertising Profit over Privacy uses the 1990s as its backdrop to show how the massive data collection infrastructure that undergirds the internet today is the result of twenty five years of technical and political economic engineering Crain considers the social causes and consequences of the internet s rapid embrace of consumer monitoring detailing how advertisers and marketers adapted to the existential threat of the internet and marshaled venture capital to develop the now ubiquitous business model called surveillance advertising He draws on a range of primary resources from government industry and the press and highlights the political roots of internet advertising to underscore the necessity of political solutions to reign in unaccountable commercial surveillance The dominant business model on the internet surveillance advertising is the result of political choices not the inevitable march of technology Unlike many other countries the United States has no internet privacy law A fascinating prehistory of internet advertising giants like Google and Facebook Profit over Privacy argues that the internet did not have to turn out this way and that it can be remade into something better *Deconstructing Digital Capitalism and the*

Smart Society Mel van Elteren,2025-01-01 Today s critics of big online platforms tend to consider privacy breaches monopolistic practices and the deployment of surveillance technologies as the main problems Internet reformers suggest the answers to these issues reside in more and better regulations While the questions of privacy data and size are indeed important they are secondary however to a deeper set of concerns about platform ownership and control and who benefits from the current status quo This book examines these issues and offers an historical overview and in depth analysis of digital capitalism and its prevailing practices as it has become increasingly intertwined with various forms of online surveillance behavior modification and the delegation of managerial functions to algorithmic and automated systems in platform economies The approach taken extends to the wider array of data driven internet connected and automated systems that involve digital devices and technologies centered on three smart spaces the smart self the smart home and the smart city Antitrust and other regulatory measures by the European Union and the United States that are aimed at restraining platform capitalism are also discussed The focus in particular is on recent developments regarding artificial intelligence and their

potentially harmful implications This is followed by a critical look at proposals for more far reaching institutional reforms revolving around the creation of forms of platform socialism that build partly on existing practices of platform cooperativism The book concludes with a diagnosis of the global situation among the competing digital empires the United States the European Union and China and considers whether or not under the present conditions any form of democratic platform socialism could materialize on a wider scale in the near future

Sideways Josh O'Kane, 2024-11-12 From the tech reporter who most closely pursued the Sidewalk Labs fiasco in Toronto an uncompromising look into what the Google sister company's failure in urban development reveals about Big Tech data and the monetization of everything When former New York deputy mayor Dan Doctoroff landed in Toronto promising a revolution in better living through technology the locals were starstruck In 2017 a small parcel of land on the city's underdeveloped lakeshore was available for development and with Google co founder Larry Page and chairman Eric Schmidt leaning into Sidewalk Labs pitch for the long forsaken property with Doctoroff as the urban planning company's CEO Sidewalk's bid crushed the competition But as soon as the bid was won cracks appeared in the partnership between Doctoroff's team and Waterfront Toronto the government sponsored organization behind the contest Hundreds more acres of undeveloped former port lands kept creeping into Sidewalk's plans and questions were emerging about how much the public would benefit from the company's vision for a high tech neighbourhood and the data it could harvest from residents The ensuing fight to reel in the power of Sidewalk Labs became a crucible moment for the worldwide battle for digital rights and against the extension of a digital behemoth's corporate might into the physical world In the tradition of boardroom dramas like *Bad Blood* and *Super Pumped* *Sideways* signals to the world that all may not be lost in the effort to contain the rapidly growing power of Big Tech

Future Politics Jamie Susskind, 2018-09-04 Politics in the Twentieth Century was dominated by a single question how much of our collective life should be determined by the state and what should be left to the market and civil society Now the debate is different to what extent should our lives be directed and controlled by powerful digital systems and on what terms Digital technologies from artificial intelligence to blockchain from robotics to virtual reality are transforming the way we live together Those who control the most powerful technologies are increasingly able to control the rest of us As time goes on these powerful entities usually big tech firms and the state will set the limits of our liberty decreeing what may be done and what is forbidden Their algorithms will determine vital questions of social justice In their hands democracy will flourish or decay A landmark work of political theory *Future Politics* challenges readers to rethink what it means to be free or equal what it means to have power or property and what it means for a political system to be just or democratic In a time of rapid and relentless changes it is a book about how we can and must regain control Winner of the Estoril Global Issues Distinguished Book Prize

Bored, Lonely, Angry, Stupid Luke Fernandez, Susan J. Matt, 2020-07-07 An Entrepreneur Best Book of the Year Facebook makes us lonely Selfies breed narcissism On Twitter hostility reigns Pundits and psychologists warn that digital technologies

substantially alter our emotional states but in this lively investigation of changing feelings about technology we learn that the gadgets we use don't just affect how we feel they can profoundly change our sense of self When we say we're bored we don't mean the same thing as a Victorian dandy Could it be that political punditry has helped shape a new kind of anger Luke Fernandez and Susan Matt take us back in time to consider how our feelings of loneliness boredom vanity and anger have evolved in tandem with new technologies Technologies have been shaping our emotional culture for more than a century argue computer scientist Luke Fernandez and historian Susan Matt in this original study Marshalling archival sources and interviews they trace how norms surrounding loneliness have shifted with technological change Nature A powerful story of how new forms of technology are continually integrated into the human experience Publishers Weekly

Platform Neutrality Rights Hannibal Travis, 2024-07-24 This book analyzes questions of platform bias algorithmic filtering and ranking of Internet speech and declining perceptions of online freedom Courts have intervened against unfair platforms in important cases but they have deferred to private sector decisions in many others particularly in the United States The First Amendment human rights law competition law Section 230 of the Communications Decency Act and an array of state and foreign laws address bad faith conduct by Internet platforms or other commercial actors Arguing that the problem of platform neutrality is similar to the net neutrality problem the book discusses the assault on freedom of speech that emerges from public private partnerships The book draws parallels between U.S. constitutional and statutory doctrines relating to shared spaces and the teachings of international human rights bodies relating to the responsibilities of private actors It also connects the dots between new rights to appeal account or post removals under the Digital Services Act of the European Union and a variety of fair treatment obligations of platforms under American and European competition laws public accommodations laws and public utilities laws Analyzing artificial intelligence AI regulation from the point of view of social media and video platform users the book explores overlaps between European and U.S. efforts to limit algorithmic censorship or shadow banning The book will be of interest to students and scholars in the field of cyberlaw the law of emerging technologies and AI law

Platform Urbanism Sarah Barns, 2019-12-07 This book reflects on what it means to live as urban citizens in a world increasingly shaped by the business and organisational logics of digital platforms Where smart city strategies promote the roll out of internet of things IoT technologies and big data analytics by city governments worldwide platform urbanism responds to the deep and pervasive entanglements that exist between urban citizens city services and platform ecosystems today Recent years have witnessed a backlash against major global platforms evidenced by burgeoning literatures on platform capitalism the platform society platform surveillance and platform governance as well as regulatory attention towards the market power of platforms in their dominance of global data infrastructure This book responds to these developments and asks How do platform ecosystems reshape connected cities How do urban researchers and policy makers respond to the logics of platform ecosystems and platform intermediation What sorts of multisensory urban engagements are

rendered through platform interfaces and modalities And what sorts of governance challenges and responses are needed to cultivate and champion the digital public spaces of our connected lives **Recapture the Rapture** Jamie Wheal, 2021-04-27

A highly personal richly informed and culturally wide ranging meditation on the loss of meaning in our times and on pathways to rediscovering it Gabor Mat MD author of *In The Realm of Hungry Ghosts Close Encounters With Addiction* A neuroanthropologist maps out a revolutionary new practice Hedonic Engineering that combines the best of neuroscience and optimal psychology It s an intensive program of breathing movement and sexuality that mends trauma heightens inspiration and tightens connections helping us wake up grow up and show up for a world that needs us all This is a book about a big idea And the idea is this Slowly over the past few decades and now suddenly all at once we re suffering from a collapse in Meaning Fundamentalism and nihilism are filling that vacuum with consequences that affect us all In a world that needs us at our best diseases of despair tribalism and disaster fatigue are leaving us at our worst It s vital that we regain control of the stories we re telling because they are shaping the future we re creating To do that we have to remember our deepest inspiration heal our pain and apathy and connect to each other like never before If we can do that we ve got a shot at solving the big problems we face And if we can t Well the dustbin of history has swallowed civilizations older and fancier than ours This book is divided into three parts The first Choose Your Own Apocalypse takes a look at our current Meaning Crisis where we are today why it s so hard to make sense of the world what might be coming next and what to do about it It also makes a case that many of our efforts to cope whether anxiety and denial or tribalism and identity politics are likely making things worse The middle section The Alchemist Cookbook applies the creative firm IDEO s design thinking to the Meaning Crisis This is where the book gets hands on taking a look at the strongest evolutionary drivers that can bring about inspiration healing and connection From breathing to movement sexuality music and substances these are the everyday tools to help us wake up grow up and show up AKA how to blow yourself sky high with household materials And the best part They re accessible by anyone anywhere no middleman required Transcendence democratized The final third of the book Ethical Cult Building focuses on the tricky nature of putting these kinds of experiences into gear and into culture because anytime in the past when we ve figured out combinations of peak states and deep healing we ve almost always ended up with problematic culty communities Playing with fire has left a lot of people burned This section lays out a roadmap for sparking a thousand fires around the world each one unique and tailored to the needs and values of its participants Think of it as an open source toolkit for building ethical culture In *Recapture the Rapture* we re taking radical research out of the extremes and applying it to the mainstream to the broader social problem of healing believing and belonging It s providing answers to the questions we face how to replace blind faith with direct experience how to move from broken to whole and how to cure isolation with connection Said even more plainly it shows us how to revitalize our bodies boost our creativity rekindle our relationships and answer once and for all the questions of why we are here and what do we do now In a world that needs the best of us from
