Thumbs Toes And Tears And Other Traits That Make Us Human:

Thumbs, Toes, and Tears Chip Walter, 2008-02-05 A look at what makes us human draws upon scientific evidence and identifies six traits the big toe an opposable thumb the pharynx and the ability to laugh cry and kiss that separate humans from the other members of the animal kingdom

Thumbs, Toes, and Tears Chip Walter, 2009-05-26 The fascinating evolutionary links between six seemingly unremarkable traits that make us the very remarkable creatures we are Countless behaviors separate us from the rest of the animal kingdom but all of them can be traced one way or another to six traits that are unique to the human race our big toe our opposable thumb our oddly shaped pharynx and our ability to laugh kiss and cry At first glance these may not seem to be connected but they are Each marks a fork in the evolutionary road where we went one way and the rest of the animal kingdom went another Each opens small passageways on the peculiar geography of the human heart and mind Walter weaves together fascinating insights from complexity theory the latest brain scanning techniques anthropology artificial intelligence cognitive psychology and robotics to explore how the smallest of changes over the past six million years all shaped by the forces of evolution have enabled a primate once on the brink of extinction to evolve into a creature that would one day create all of the grand and exuberant edifices of human culture As the story of each trait unfolds Walter explains why our brains grew so large and complex why we find one another sexually attractive how toolmaking laid the mental groundwork for language why we care about what others think and how we became the creature that laughs and cries and falls in love *Thumbs Toes and Tears* is original informative and delightfully thought provoking

Last Ape Standing Chip Walter, 2013-01-29 Seeks to explain why homo sapiens survived while other hominids did not drawing on recent scientific discoveries and examining the survival value of such factors as premature births long childhoods and an extremely social nature

Scientific American Reader to Accompany Schacter/Gilbert/Wegner Daniel L. Schacter, 2008-07 The result of an exclusive partnership with Scientific American the articles in this collection were personally selected from the pages of world s foremost scientific magazine by the authors Dan Schacter Dan Gilbert and Dan Wegner

Why Only Humans Weep Ad Vingerhoets, 2013-02-28 Crying has fascinated mankind for millenia Since ancient times we have known that emotional tears are a unique human characteristic Unsurprisingly over hundreds of years scholars from different backgrounds have speculated about the origin and functions of human tears According to Charles Darwin tears fulfilled no adaptive function And yet this seems in sharp contrast to statements in the popular media about the significance of crying Crying is thought to bring relief and is considered healthy and withholding tears unhealthy In addition tears have been said to inhibit aggression in assaulters and to promote social bonding Perhaps that could explain why tears have been so important in our evolution Ad Vingerhoets is one of the few scientists in the world to have studied crying He examines in *Why only humans weep* which claims about crying are scientifically tenable which are fact and which are fiction Though a psychologist he doesn t just restrict himself to the current psychological literature but also explores work in evolutionary

Why We Dance Kimerer L. LaMothe, 2015-04-07 Within intellectual paradigms that privilege mind over matter dance has long appeared as a marginal derivative or primitive art Drawing support from theorists and artists who embrace matter as dynamic and agential this book offers a visionary definition of dance that illuminates its constitutive work in the ongoing evolution of human persons Why We Dance introduces a philosophy of bodily becoming that posits bodily movement as the source and telos of human life Within this philosophy dance appears as an activity that humans evolved to do as the enabling condition of their best bodily becoming Weaving theoretical reflection with accounts of lived experience this book positions dance as a catalyst in the development of human consciousness compassion ritual proclivity and ecological adaptability Aligning with trends in new materialism affect theory and feminist philosophy as well as advances in dance and religious studies this work reveals the vital role dance can play in reversing the trajectory of ecological self destruction along which human civilization is racing
