Tidal Hydrology Hydraulics And Scour At Bridges:

Tidal Hydrology, Hydraulics and Scour at Bridges United States Department of Transportation, Federal Highway Administration, 2015-02-24 Hydraulic Engineering Circular No 25 The purpose of this manual is to provide guidance on hydraulic modeling for bridges over tidal waterways This document includes descriptions of 1 common physical features that affect transportation projects in coastal areas 2 tide causing astronomical and hydrologic processes 3 approaches for determining hydraulic conditions for bridges in tidal waterways 4 applying the hydraulic analysis results to provide scour estimates By using the methods in this manual better predictions of bridge hydraulics and scour in tidal waterways will result In many cases simplified tidal hydraulic methods will provide adequate results However when the simplified methods yield overly conservative results use of the recommended modeling approaches will provide more realistic predictions and hydraulic variables and scour

Stream Stability and Scour at Highway Bridges Everett V. Richardson, Peter F. Lagasse, 1999-01-01 Sponsored by the Water Resources Engineering Hydraulics Division of ASCE This collection contains 75 papers and 321 abstracts presented at conferences sponsored by the Water Resources Engineering Hydraulics Division of ASCE from 1991 through 1998 The collection contains many new and expanded versions of the original papers and is designed to assist the practitioner with the concepts in evaluating stream instability and scour at bridges Topics include history of bridge scour research bridge scour determination stream stability and geomorphology construction scour instrumentation for measuring and monitoring field measurement computer and physical modeling of bridge scour scour at culverts and economic and risk analysis One important paper contains 384 field measurements of local scour at piers made by the U S Geological Survey

Ecology of Tidal Freshwater Forested Wetlands of the Southeastern United States William H. Conner, Thomas W. Doyle, Ken W. Krauss, 2007-06-24 Tidal freshwater forested wetlands represent an intriguing and und studied type of ecosystem in the southeastern United States The phy ographic position of tidal freshwater forested wetlands in occupying low lying coastal areas makes them susceptible to upland runoff tidal flo ing saltwater intrusion and other global climate change phenomena While information on them is rather sparse in the scientific literature these ecosystems are among the most sensitive to sea level rise and increased drought or flood frequency Tidal freshwater forested wetlands are readily impacted by acute and chronic exposure to even low levels of salinity The combined stress of flooding and salinity may compound the threat in these systems such that the margin for survival and compensation to changing climate is much less than for other coastal habitats In this book we bring together principal investigators whose

research focus has targeted the hydrology biogeochemistry community ecology forestry stress physiology and restoration of tidal freshwater forested wetlands in the southeastern United States It is our foremost intent to develop an up to date treatise that includes not only peer reviewed journal articles but also the dispersive grey literature on the topic in order to spark future research interest in tidal freshwater forested wetlands and to provide land managers with a concise overview of research findings We have thus formalized all scientific and common names into the standard of ITIS Integrated Taxonomic Information System <http://www.itis.gov>

Coastal Structures 2011 - Proceedings Of The 6th International Conference (In 2 Volumes) Shigeo Takahashi, Kenichiro Shimosako, Masahiko Isobe, Nobuhisa Kobayashi, 2013-04-04 Coastal Structures are undergoing renewal and innovation to better serve the needs of our society from environmental co existence and habitat enhancement to risk management The CST2011 conference is the sixth in a series that highlights coastal disaster preparedness and ocean utilization in a changing climate The conferences have frequently yielded milestone works and highly cited references in the field

Scour at Bridge Foundations on Rock Jeffrey Ray Keaton, Subhendu Kumar Mishra, Paul E. Clopper, 2012 This report provides a methodology for estimating the time rate of scour and the design scour depth for a bridge founded on rock as well as design and construction guidelines for application of the methodology It will be of interest to hydraulic bridge and geotechnical engineers responsible for designing bridge foundations on rock or maintenance engineers concerned about existing bridges founded on erodible rock
