Memory, History, Forgetting Paul Ricoeur, 2024-05-31 A noted philosopher examines the morality behind recognizing specific historical moments while leaving equally important ones unacknowledged Why do major historical events such as the Holocaust occupy the forefront of the collective consciousness while profound moments such as the Armenian genocide the McCarthy era and France's role in North Africa stand distantly behind Is it possible that history overly remembers some events at the expense of others A landmark work in philosophy Paul Ricoeur's *Memory History Forgetting* examines this reciprocal relationship between remembering and forgetting showing how it affects both the perception of historical experience and the production of historical narrative *Memory History Forgetting* like its title is divided into three major sections Ricoeur first takes a phenomenological approach to memory and mnemonical devices The underlying question here is how a memory of the present can be of something absent the past The second section addresses work by historians by reopening the question of the nature and truth of historical knowledge Ricoeur explores whether historians who can write a history of memory can truly break with all dependence on memory including memories that resist representation The third and final section is a profound meditation on the necessity of forgetting as a condition for the possibility of remembering and whether there can be something like happy forgetting in parallel to happy memory Throughout the book there are careful and close readings of the texts of Aristotle and Plato of Descartes and Kant and of Halbwachs and Pierre Nora A momentous achievement from one of the most significant philosophers of our age *Memory History Forgetting* furthers Ricoeur's reflections on ethics and the problems of responsibility and representation
