world Teaching and Learning Online Franklin S. Allaire, Jennifer E. Killham, 2022-04-01 Science is unique among the disciplines since it is inherently hands on. However, the hands on nature of science instruction also makes it uniquely challenging when teaching in virtual environments. How do we as science teachers deliver high quality experiences in an online environment that leads to age grade level appropriate science content knowledge and literacy but also collaborative experiences in the inquiry process and the nature of science? The expansion of online environments for education poses logistical and pedagogical challenges for early childhood and elementary science teachers and early learners. Despite digital media becoming more available and ubiquitous and increases in online spaces for teaching and learning, Killham et al 2014, Wong et al 2018, PreK-12 teachers consistently report feeling underprepared or overwhelmed by online learning environments. Molnar et al 2021, Seaman et al 2018. This is coupled with persistent challenges related to elementary teachers' lack of confidence and low science teaching self-efficacy. Brigido, Borrachero, Bermejo, Gunning, Duran, Duran 2004. Ideal for undergraduate teacher candidates, graduate students, teacher educators, classroom teachers, parents, and administrators, this book addresses why and how teachers use online environments to teach science content and work with elementary students through a research-based foundation. *I'm a Virus!* Bridget Heos, 2022-04-12 Scary science is introduced with humor-laced facts in this new nonfiction picture book series from a prolific award-winning children's book author. Starting with our tiniest invader, the common cold virus, and its more frightening relatives, how does a virus make us sick? How does it spread? And what can people do to beat them? Hi, I'm Virus! And I'm here to answer all these questions and more. In friendly, simple text, the most common virus, rhinovirus, the common cold, explains how viruses work and spread. With funny, engaging, and informative illustrations, this is the perfect way to explain viruses to young children who have questions in the wake of a pandemic. The nonthreatening common cold walks readers through the basics of viruses and then features past viruses we have defeated as well as introducing COVID-19. The start of a new series designed to make scary science more approachable. Science Buddies is here to explain the world to curious young minds. *Inside Your Insides* Claire Eamer, 2016-09-06 None of us are ever really alone.
