What About My Security What About My Security:

Bring Your Own Device Security Policy Compliance Framework Rathika Palanisamy, Azah Anir Norman, Miss Laiha Mat Kiah, Tutut Herawan, 2025-03-29 Proliferation of Bring Your Own Device BYOD has instigated a widespread change fast outpacing the security strategies deployed by organizations The influx of these devices has created information security challenges within organizations further exacerbated with employees inconsistent adherence with BYOD security policy To prevent information security breaches compliance with BYOD security policy and procedures is vital This book aims to investigate the factors that determine employees BYOD security policy compliance by using mixed methods approach Security policy compliance factors BYOD practices and security risks were identified following a systematic review approach Building on Organizational Control Theory Security Culture and Social Cognitive Theory a research framework positing a set of plausible factors determining BYOD security policy compliance was developed Next with a purposive sample of eight information security experts from selected public sector organizations interviews and BYOD risk assessments analysis were performed to furnish in depth insights into BYOD risks its impact on organizations and recommend control measures to overcome them This led to the suggestion of four control measures to mitigate critical BYOD security risks such as Security Training and Awareness SETA policy top management commitment and technical countermeasures The control measures were mapped into the research framework to be tested in the following quantitative phase The proposed research framework was tested using survey results from 346 employees of three Critical National Information Infrastructure CNII agencies Using Partial Least Squares Structural Equation Modelling PLS SEM the framework s validity and reliability were evaluated and hypotheses were tested Findings show that perceived mandatoriness self efficacy and psychological ownership are influential in predicting employees BYOD security policy compliance Specification of security policy is associated with perceived mandatoriness while BYOD IT support and SETA are significant towards self efficacy Unexpectedly security culture has been found to have no significant relationship to BYOD security policy compliance Theoretical practical and methodological contributions were discussed and suggestions for future research were recommended The analysis led to a number of insightful findings that contribute to the literature and the management which are predominantly centered on traditional computing In view of the ever increasing BYOD threats to the security of government information it is imperative that IT managers establish and implement effective policies to protect vital information assets Consequently the findings of this study may benefit policymakers particularly in the public sector in their efforts to increase BYOD security policy compliance among employees
