Environmental Philosophy and Environmental Activism Don E. Marietta, Lester Embree, 1995-09-06 This collection of new essays by eleven distinguished environmental philosophers addresses two main questions first whether environmental philosophy and ethics should be seen as a form of applied philosophy or as something else perhaps best called practical philosophy and second how environmental philosophy is practiced in human life especially in the lives of academics

Environmental Ethics and Policy-Making Mikael Stenmark, 2017-03-02 Environmental issues raise crucial questions What should we value What is our place in nature What kind of life should we live How should we interact with other living things Environmental management and policy making is ultimately based on answers to these and similar questions but do we need a new ethics to be able overcome the environmental crisis we face This book addresses these important questions and explores the values that decision makers often presuppose in their environmental policy making Examining the content of the ethics of sustainable development that the UN and the world's governments want us to embrace this book examines alternatives to this kind of ethics and the differences in basic values that these make in practice Offering a detailed analysis of the ethics that lie behind current policy making as it is expressed in documents such as Agenda 21 and the Rio Declaration this unique contribution to the field of environmental studies shows how different environmental ethical theories support different goals of environmental management and generate different policies when it comes to population growth agriculture and preservation and management of wilderness areas and endangered species Mikael Stenmark concludes that policy makers must take more seriously the value assumptions and conflicts connected to

environmental issues and state explicitly on what values their own proposals and decisions are based and why these should be accepted Those studying environmental issues or environmental philosophy will find this accessible text invaluable in presenting a clear understanding of environmental ethics and contemporary applications and policies *Environmental Ethics and International Policy* H. ten Have, 2006 Environmental concerns figure prominently in the work of the United Nations and especially in the United Nations Educational Scientific and Cultural Organization One focus of UNESCO has to do with the ethical principles at stake in environmental sciences and policies What is the moral value of the environment What in nature is worth protecting preserving or respecting What do we mean by global sustainability How much should we care for the interests of future generations What are the implications of the principle of justice for policy decisions related to environmental issues In this volume eight experts in environmental ethics from around the world advising the World Commission on the Ethics of Scientific Knowledge and Technology come together to address these questions The studies presented here analyze the state of the art in the relatively new area of applied ethics that is environmental ethics They also develop approaches to determining how international policy can promote ethical reflection about the environment Publisher's description **Environmental Ethics**, 2007 **Environmentalism** David Pepper, Frank Webster, George Revell, 2003
