Nanomaterials Handbook Yury Gogotsi, 2006-01-26 Even before it was identified as a science and given a name nanotechnology was the province of the most innovative inventors In medieval times craftsmen ingeniously employing nanometer sized gold particles created the enchanting red hues found in the gold ruby glass of cathedral windows Today nanomaterials are being just as creatively used to improve old products as well as usher in new ones From tires to CRTs to sunscreens nanomaterials are becoming a part of every industry The Nanomaterials Handbook provides a comprehensive overview of the current state of nanomaterials Employing terminology familiar to materials scientists and engineers it provides an introduction that delves into the unique nature of nanomaterials Looking at the quantum effects that come into play and other characteristics realized at the nano level it explains how the properties displayed by nanomaterials can differ from those displayed by single crystals and conventional microstructured monolithic or composite materials The introduction is followed by an in depth investigation of carbon based nanomaterials which are as important to nanotechnology as silicon is to electronics However it goes beyond the usual discussion of nanotubes and nanofibers to consider graphite whiskers cones

and polyhedral crystals and nanocrystalline diamonds It also provides significant new information with regard to nanostructured semiconductors ceramics metals biomaterials and polymers as well as nanotechnology s application in drug delivery systems bioimplants and field emission displays The Nanomaterials Handbook is edited by world renowned nanomaterials scientist Yury Gogotsi who has recruited his fellow pioneers from academia national laboratories and industry to provide coverage of the latest material developments in America Asia Europe and Australia **Journal of Tribology** ,1992 Includes experimental numerical and theoretical articles dealing with all aspects of tribology including friction and wear fluid film lubrication elastohydrodynamic lubrication surface properties and characterization contact mechanics magnetic recordings tribological systems seals bearing design and technology gears metalworking lubricants and artificial joints Laser Induced Damage in Optical Materials ,1994 *Smart Optical Inorganic Structures and Devices* Steponas Ašmontas,Jonas Gradauskas,2001 *Ceramic Abstracts* ,1999 **Government Reports Annual Index** ,1994 Evolution of Thin-Film and Surface Structure and Morphology: Volume 355 B.
