Chatterton, 2024-01-05 Excerpt I am by no means unaware that between the sailing ship and the steamship there is a wide difference as well in character as in their respective development But that is no reason for supposing that the steamship is

less interesting in her history or less deserving of admiration in her final presentation Around the sailing ship there hovers eternally a halo of romance that is undeniable even by the most modern enthusiast But on the other hand the sailing ship in the whole of her career has not done more for the good of humanity than the steamship within a century or less It requires but a moment of thought to realise the truth of this statement and for that reason alone the history of the steamship makes its appeal not to a special class of reader but to all who interest themselves in progress in the development of their own country and empire in the welfare of the world generally and the evolution from stagnation to beneficial activity and prosperity There are but few civilised people nowadays who have not been brought into contact with the steamship in one way or another Perhaps sometimes it has been unwillingly though at other times to their great gain In some of those moments which have seemed to drag on wearily during the enforced idleness of a voyage the inquiring mind has over and over again exhibited a desire to know something of the nature of the fine creature which is carrying him from one distant country to another He has desired to know in plain non technical language how the steamship idea began how it developed how its progress was modified and what were the influences at work that moulded its character as we know it to day Further he has felt the desire to show an intelligent interest in her various characteristics and to obtain a fair grasp of the principles which underlay the building and working of the steamship As a normal being himself with mind and sympathy he has wished to be able to enter into the difficulties that have been overcome so splendidly by the skill and enterprise of others both past and present If he talks to the professional sailor or marine engineer they may not even if they have the inclination to unbend be able easily to separate their explanation from the vesture of technicality and the inquirer is scarcely less satisfied than before It is then with a view of supplying this want that I have aimed to write such a book as will interest without I trust wearying the general reader
