Conservation of Marine Archaeological Objects Colin Pearson,2014-05-20 Over the past twenty years there has been a significant increase in underwater activities such as scuba diving which coupled with the adventure and romance always associated with shipwrecks has led to rapid developments in the discovery and excavation of shipwrecked material These shipwrecks are invaluable archaeological time capsules which in the majority of cases have come to an equilibrium with their environment As soon as artefacts on the wreck site are moved this equilibrium is disturbed

and the artefacts may commence to deteriorate sometimes in a rapid and devastating fashion In fact excavation without having conservation facilities available is vandalism the artefacts are much safer being left on the sea bed Such famous shipwrecks as the Mary Rose 1545 the Wasa 1628 and the Batabia 1629 have not only brought the world s attention to these unique finds but have also produced tremendous conservation problems The treatment of a 30 metre waterlogged wooden hull or large cast iron cannon is still causing headaches to conservators *Networked Neighbourhoods* Patrick Purcell,2007-11-08 The setting for this book is the networked community The treatment of the subject matter is broad and interdisciplinary with contributions from computer science sociology design human factors and communication technology The chapter contributors drawn from across Europe and North America offer a varied
