

# The Titrando in the modern laboratory

## **Touch Control – a user comfort**

The Touch Control is a decidedly ergonomic and modern operating element. You can hold it in your hand, put it on the laboratory bench or use a holder system to attach it to a wall or bench to save the wall. These last two possibilities save space and also protect the Touch Control from chemicals. Up to three Titrando's can be controlled by a single Touch Control.

## **Titration and PC – a harmonious duo**

No matter whether you operate the Titrando with the Touch Control and your fingers or with a PC and a mouse – both appearance and operation are practically identical. Methods and determinations are 100% compatible. The master software **Manager** is brilliant and more – it opens up many other possibilities such as database functionality, plotted titration with several instruments and much more.

## **Data management is knowledge management**

The data that your Titrando system provides you with can be printed out and stored in a conventional manner. However, all advanced data management functions are available. For example storage on a PC/MCU and CompactFlash that is simply inserted in the Touch Control, in the PC/MCU port of the PC or an appropriate card reader. If you work with PC Control or **Manager**, you can use all the storage options offered by the PC world, and on request the Titrando can produce a machine-readable PC/MCU report.

## **Lab Link**

Lab Link opens up internet networks to the Titrando and makes it internet-compatible, with all that this implies. In this way, the Titrando can be integrated into GMP methods and determinations can be downloaded from the internet network or stored on them; printers can be used for printing out analysis reports. The Titrando is even accessible from the office by remote control.

## **Compatibility and traceability**

The Titrando System is entirely oriented towards quality management in the laboratory and offers the following possibilities:

- "Auto-diagnostic" test after switching on.
- Monitoring of calibration and service intervals.
- Monitoring of the laboratory data of sensors.
- Monitoring of time and results.
- All changes to the methods are documented.
- Strict control of rights of access using login and password, complying with FDA Regulation 21 CFR Part 11 regarding electronic signatures and electronic records.
