Rulership in 1st to 14th century Scandinavia Dagfinn Skre, 2019-12-16 This book seeks to revitalise the somewhat stagnant scholarly debate on Germanic rulership in the first millennium AD A series of comprehensive chapters combines literary evidence on Scandinavia's politics, kings and other rulers with archaeological, documentary, toponymical and linguistic evidence The picture that emerges is one of surprisingly stable rulership institutions, sites and myths while control of them was contested between individuals, dynasties and politics While in the early centuries Scandinavia was integrated in Germanic Europe, profound societal and cultural changes in 6th century Scandinavia and the Christianisation of Continental and English kingdoms set northern kingship on a different path The pagan heroic warrior ethos essential to kingship was developed and refined only to recur overseas embodied in 9th-10th century Vikings Three chapters on a hitherto unknown masonry royal manor at Avaldsnes in western Norway excavated 2017 concludes this volume with discussions of the late medieval peak of Norwegian kingship and its eventual downfall in the late 14th century This book's discussions and results are relevant to all scholars and students of 1st millennium Germanic kingship, politics and societies
