Agriculture plays a significant role in Indian economy which contributes 16.5 % of total Gross Domestic Product (GDP) in our country and provides livelihood to two thirds of the population and raw materials for many industries. The Indian agriculture has witnessed profound changes due to advanced cutting edge technologies. Increasing the agricultural productivity is necessary to feed the burgeoning population and thereby to reduce hunger and poverty. Poverty is one of the causes of food insecurity, hunger and malnutrition and affects human welfare which has direct bearing on the agricultural growth and development of the country. In general, food and nutrition security is achieved, if adequate food (quantity, quality, safety,

socio-cultural acceptability) is available and accessible for and satisfactorily utilized by all individuals at all times to live a healthy and active life. Food and nutrition security has four dimensions viz., availability, access, utilization and stability that encompass both chronic and acute situations. Food insecurity arises when the people don't have reliable access to a sufficient quantity of affordable nutritious food. This food insecurity creates hunger which reduces the human performance both physical activities and cognitive functions.

According to FAO estimates in 'The state of Food security and Nutrition in the world 2019 report, 194.4 million (14.5 %) of the population is undernourished in India. This scenario is reflected in the Global Hunger Index 2019

which ranked India at 102 out of 117 countries. Global hunger index (GHI) is calculated based on the four indicators viz., child mortality, undernourishment, child wasting (weight for age) and child stunting. India's GHI score is 30.3 which indicates that the level of hunger is serious in the country. The report warned that climate change was causing alarming levels of hunger and making it more difficult to feed people in the world's most vulnerable regions. Climate change is affecting the quality and safety of food and worsening the nutritional value of produced food.

In this context, there is a need for 'food-based approaches' to end poverty, hunger and also to combat malnutrition. Tropical root and tuber crops like cassava/tapioca, sweet potatoes,

Singhal, Pragati Kaushal, 2016-08-23 Roots and tubers are considered as the most important food crops after cereals and contribute significantly to sustainable development income generation and food security especially in the tropical regions. The perishable nature of roots and tubers demands appropriate storage conditions at different stages starting from farmers to its final consumers. Because of their highly perishable nature, search for efficient and better methods of preservation processing have been continuing alongside the developments in different arena. This book covers the processing and technological aspects of root and tuber foods detailing the production and processing of roots and tubers such as taro, cassava, sweet potato, yam, and elephant foot yam. Featuring chapters on anatomy, taxonomy, and physiology, molecular and biochemical characterization, GAP, GMP, HACCP, storage techniques, as well as the latest technological interventions in Taro, Cassava, Sweet potato yam, and Elephant foot Yam. **Proceedings of the Second International Symposium on Tropical Root and Tuber Crops;** University of Hawaii (Honolulu). The book highlights the distribution, symptoms, and damage biology, survival, and spread of each pest and describes management methods. It also sheds light on different eco-friendly pest management strategies including physical, cultural, chemical, biological, host resistance, and integrated methods. The book is written in a lucid style using easy-to-understand language and offers adoptable recommendations involving eco-friendly control measures. It serves as a useful reference source for policy makers, research and extension workers, practicing farmers, and students. The material can also be used for teaching post graduate courses in state agricultural universities. *Tropical Root and Tuber Crops*

Adopting the Tune of Term: An Psychological Symphony within **Tropical Root And Tuber Crops Tropical Root And Tuber Crops**

In some sort of eaten by screens and the ceaseless chatter of fast conversation, the melodic splendor and emotional symphony produced by the written word usually diminish in to the back ground, eclipsed by the constant sound and disturbances that permeate our lives. However, located within the pages of **Tropical Root And Tuber Crops Tropical Root And Tuber Crops** a charming fictional prize full of natural feelings, lies an immersive symphony waiting to be embraced. Constructed by a masterful composer of language, that interesting masterpiece conducts visitors on a psychological journey, skillfully unraveling the hidden melodies and profound affect resonating within each carefully constructed phrase. Within the depths with this emotional examination, we will explore the book is main harmonies, analyze their enthralling writing design, and submit ourselves to the profound resonance that echoes in the depths of readers souls.
