This is an up to date guide for teachers and parents administrators governors students and others to help the find their way about the increasingly complex world of education The main section provides a dictionary that is more than a simple set of definitions many words in education have been put into some kind of historical context to become fully meaningful The second part gives some important landmarks from the nineteenth century to the present time and also provides a list of political heads of education since state education was established The final section is devoted to a list of acronyms and abbreviations both of which have been the subject of multiple definitions in recent years

Teacher Education in Transition John Furlong, 2000 The 1990s were a period of quite dramatic change for initial teacher education in England and Wales with wave after wave of Government sponsored reforms The changes introduced were highly controversial as those in higher education who were traditionally responsible for teacher education felt marginalized many believed that what was at stake in these reforms was the nature of teacher professionalism itself It was against this background of policy change and political ferment that the Economic and Social Research Council funded two successive research projects to evaluate the consequences of the reforms The projects known as MOTE Modes of Teacher Education included two national surveys as well as more detailed case studies of particular courses In this volume the authors draw upon these two major studies as well as more recent policy analysis to give a fascinating overview of the impact of policy change throughout the 1990s In doing so they also consider whether a new form of professionalism was indeed created
