Shin,2014-12-17 Volatility in Korean Capital Markets summarizes the Korean experience of volatile capital flows analyzes the economic consequences evaluates the policy measures adopted and suggests new measures for the future *Africa's Pulse, No. 18, October 2018* Cesar Calderon, Gerard Kambou,Vijdan Korman,2018-10-03 Africa s Pulse is a biannual publication containing an analysis of the near term macroeconomic outlook for the region Each issue also includes a section focusing upon a topic that represents a particular development challenge for the continent It is produced by the Office of the Chief Economist for the Africa Region of the World Bank Recent data point to a weakening of economic growth in Sub Saharan Africa in 2018 according to the new Africa s Pulse a bi annual analysis of the state of African economies conducted by the World Bank The growth slowdown can be attributed to the lower than expected performance of the large countries in the region South Africa and Nigeria The downswing reflects poorer performance in agriculture following droughts and lower performance of commodity sectors

The Bankers' Blacklist Julia C. Morse,2022-01-15 In The Banker s Blacklist Julia C Morse demonstrates how the Financial Action Task Force FATF has enlisted global banks in the effort to keep bad money out of the financial system in the process drastically altering the domestic policy landscape and transforming banking worldwide Trillions of dollars flow across borders through the banking system every day While bank to bank transfers facilitate trade and investment they also provide opportunities for criminals and terrorists to move money around the globe To address this vulnerability large economies work together through an international standard setting body the FATF to shift laws and regulations on combating illicit financial flows Morse examines how this international organization has achieved such impact arguing that it relies on the power of unofficial market enforcement a process whereby market actors punish countries that fail to meet international standards The FATF produces a public noncomplier list which banks around the world use to shift resources and services away from listed countries As banks restrict cross border lending the domestic banking sector in listed countries advocates strongly for new laws and regulations ultimately leading to deep and significant compliance improvements The Bankers Blacklist offers lessons about the peril and power of globalized finance revealing new insights into how some of today s most pressing international cooperation challenges might be addressed [The Price of Time](#) Edward Chancellor,2022-08-16 Winner of the 2023 Hayek Book Prize Longlisted for the 2022 Financial Times Business Book of the Year Award A comprehensive and profoundly relevant history of interest from one of the world s leading financial writers The Price of Time explains our current global financial position and how we got here In the beginning was the loan and the loan carried interest For at least five millennia people have been borrowing and lending at interest The practice wasn t always popular in the ancient world usury was generally viewed as exploitative a potential path to debt bondage and slavery Yet as capitalism became established from the late Middle Ages onwards denunciations of interest were tempered because interest

was a necessary reward for lenders to part with their capital And interest performs many other vital functions it encourages people to save enables them to place a value on precious assets such as houses and all manner of financial securities and allows us to price risk All economic and financial activities take place across time Interest is often described as the price of money but it is better called the price of time time is scarce time has value interest is the time value of money Over the first two decades of the twenty first century interest rates have sunk lower than ever before Easy money after the global financial crisis in 2007 2008 has produced several ill effects including the appearance of multiple asset price bubbles a reduction in productivity growth discouraging savings and exacerbating inequality and forcing yield starved investors to take on excessive risk The financial world now finds itself caught between a rock and a hard place and Edward Chancellor is here to tell us why In this enriching volume Chancellor explores the history of interest and its essential function in determining how capital is allocated and priced **Global Waves of Debt** M. Ayhan Kose, Peter Nagle, Franziska Ohnsorge, Naotaka

Sugawara, 2021-03-04 The global economy has experienced four waves of rapid debt accumulation over the past 50 years The first three debt waves ended with financial crises in many emerging market and developing economies During the current wave which started in 2010 the increase in debt in these economies has already been larger faster and broader based than in the previous three waves Current low interest rates mitigate some of the risks associated with high debt However emerging market and developing economies are also confronted by weak growth prospects mounting vulnerabilities and elevated global risks A menu of policy options is available to reduce the likelihood that the current debt wave will end in crisis and if crises do take place will alleviate their impact **Global Economic Prospects, January 2020** World Bank

Group, 2020-01-27 Global growth is projected to be slightly faster in 2020 than the post crisis low registered last year While growth could be stronger if reduced trade tensions lead to a sustained reduction in uncertainty the balance of risks to the outlook is to the downside Growth in emerging market and developing economies is also expected to remain subdued continuing a decade of disappointing outcomes A steep and widespread productivity growth slowdown has been underway in these economies since the global financial crisis despite the largest fastest and most broad based accumulation of debt since the 1970s In addition many emerging market and developing economies including low income countries face the challenge of phasing out price controls that impose heavy fiscal cost and dampen investment These circumstances add urgency to the need to implement measures to rebuild macroeconomic policy space and to undertake reforms to rekindle productivity growth These efforts need to be supplemented by policies to promote inclusive and sustainable long term growth and accelerate poverty alleviation **Global Economic Prospects** is a World Bank Group Flagship Report that examines global economic developments and prospects with a special focus on emerging market and developing countries on a semiannual basis in January and June The January edition includes in depth analyses of topical policy challenges faced by these economies whereas the June edition contains shorter analytical pieces *Globalisation* Christopher Sheil, 1998 Book length
