### INSIDE a Volcano

Under earth's crust is the mantle. The mantle can get hot enough to melt rock into liquid. When the melted rock is trapped in the earth it is called magma. As the magma escapes from earth's crust and erupts from a volcano, it is called lava.

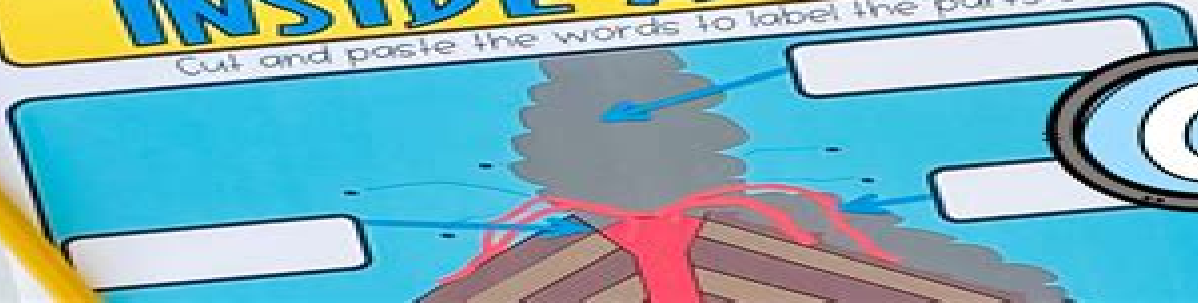

A violent eruption can be explosive, sending lava and ash high into the air. But when lava is very thick, it usually escapes in a slow-moving lava flow.

### INSIDE A VOLCANO
