Thrombolytic Therapy For Acute Stroke:

Thrombolytic Therapy for Acute Stroke Patrick D. Lyden, 2007-11-08 It often takes time for a new therapeutic modality to mature into an accepted treatment option After initial approval new drugs devices and procedures all go through this process until they become vetted by the scientific community as well as the medical community at large Thrombolysis for treatment of stroke is no exception Thrombolytic Therapy for Acute Stroke Second Edition comes four years after the first edition and provides a very comprehensive updated perspective on the use of intravenous rt TPA in acute stroke The authors provide longer term follow up on the pivotal clinical trials that led to Food and Drug Administration approval data concerning phase 4 trials in larger numbers of patients and most importantly the community experience that has accumulated since its release They add to this the latest promising information concerning intra arterial thrombolysis which is still under investigation and more speculative sections concerning possible new avenues of clinical research such as combining intravenous thrombolysis with neuroprotective therapies or intra arterial thrombolysis A wealth of factual information is supplemented by chapters containing sage opinion from Drs Lyden and Caplan concerning the logistical economic and procedural issues that have been generated since the advent of this technology Importantly diagnosis does not take a back seat to therapeutics as illustrated by sections devoted to evaluation of the stroke patient very useful illustrative cases and clinical comments and chapters on the latest in imaging as applied to this field

Thrombolytic Therapy in Acute Ischemic Stroke Werner Hacke, Gregory J. DelZoppo, Matthias Hirschberg, 2012-12-06 During the last decade scientists in both basic and clinical research have renewed their interest in the potential role of thrombolytic therapy in the treatment of acute ischemic stroke The reevaluation of this approach was kindled by our growing knowledge of the pathogenesis of thrombotic and embolic stroke and by the development of new thrombolytic agents With no proven therapy for acute ischemic stroke available the potential value of early pharmacologic recanalization of occluded vessels in the management of acute stroke patients an approach that has been supported by animal experiments and a limited number of uncontrolled clinical pilot studies is again under scrutiny A symposium on Thrombolysis in Acute Cerebral Ischemia was held in Heidelberg Germany in May 1990 to summarize and discuss the pathophysiological background for thrombolysis in acute ischemic stroke and the recent experimental and clinical experience with the new generation of thrombolytic agents The editors are fortunate to be able to include authoritative manuscripts from almost all the speakers at the symposium These include reports of work by the most active investigators in this challenging field The editors wish to express their gratitude to all the contributors for the additional work they have undertaken Additionally we would like to thank Springer Verlag Heidelberg for its generous assistance in the preparation and rapid publication of this volume Heidelberg August 1990 WERNER HACKE GREGORY J DEL ZOPPO MATTHIAS HIRSCHBERG Contents I

Thrombolytic Therapy for Stroke Patrick D. Lyden, 2001-02-23 Thrombolytic Therapy for Stroke is intended for physicians who will be treating patients in the first few

hours after stroke neurologists neurosurgeons emergency medicine physicians internists and radiologists In some areas family medicine general practice physicians may provide the majority of acute stroke care We will provide the reader with all the data necessary to understand the utility and limitations of thrombolytic therapy By reading the protocols and working through the case tutorials the reader will become sufficiently familiar with the indications and contraindications of thrombolytic therapy to begin evaluating potential patients Although nothing can replace direct instruction by more experienced physicians we hope that by imparting our accumulated knowledge we may guide those physicians who cannot attend a hands on workshop or who having heard the appropriate lectures feel the need for further guidance We will review the scientific rationale for thrombolysis first most ischemic stroke is caused by thrombo emboli second a portion of brain the penumbra remains salvageable for a few hours after vascular occlusion and third promptly delivered thrombolysis can remove the offending occlusion and restore cerebral blood flow to the penumbra in time to salvage brain and neurologic function Then we will review the preclinical development of thrombolytics for stroke patients and the early pilot trials Next we will present the pivotal clinical trials that demonstrated the efficacy and safety of thrombolysis

Thrombolytic Therapy in Acute Ischemic Stroke III Takenori Yamaguchi, Etsuro Mori, Kazuo Minematsu, Gregory J.

DelZoppo, 2012-12-06 On the threshold of an exciting new era for acute stroke diagnosis and treatment the Third International Symposium on Thrombolytic Therapy in Acute Ischemic Stroke was held in Nara Japan in April 1994 The symposium brought together some 200 basic and clinical scientists for presentations and discussions of issues vital to the understanding of thrombolytic therapy This volume compiles the major presentations of the symposium with attention to applications of new diagnostic measures such as diffusion and perfusion MRI contrast enhanced transcranial Doppler and angiography Other presentations examine the mechanisms of ischemia reperfusion injury hemorrhagic transformation and reocclusion with reviews of recent developments in thrombolytic agents The proceedings of the symposium will be of special interest to researchers physicians and students in the fields of neurology neurosurgery and nuclear medicine as well as those in pharmacology critical care medicine and related fields

Thrombolytic Therapy in Acute Ischemic Stroke Werner Hacke, Gregory J. DelZoppo, Matthias Hirschberg, 1991-06-11

During the last decade scientists in both basic and clinical research have renewed their interest in the potential role of thrombolytic therapy in the treatment of acute ischemic stroke The reevaluation of this approach was kindled by our growing knowledge of the pathogenesis of thrombotic and embolic stroke and by the development of new thrombolytic agents With no proven therapy for acute ischemic stroke available the potential value of early pharmacologic recanalization of occluded vessels in the management of acute stroke patients an approach that has been supported by animal experiments and a limited number of uncontrolled clinical pilot studies is again under scrutiny A symposium on Thrombolysis in Acute Cerebral Ischemia was held in Heidelberg Germany in May 1990 to summarize and discuss the pathophysiological background for thrombolysis in acute ischemic stroke and the recent ex
