Treatment Of Individuals With Anger Control Problems And Aggressive Behaviors:

Treatment of Individuals with Anger - Control Problems and Aggressive Behaviors Donald Meichenbaum, 2003-04
The emphasis of this book is on procedural guidelines. The focus is on working with adults although a life span developmental perspective is offered in order to appreciate how angry and aggressive behaviors develop and to consider the implications for assessment and treatment. Although the focus of the book is anger and aggressive behavior, many of the assessment and treatment strategies described could readily be applied to patients with other psychiatric disorders: anxiety, depression, impulse control, and Axis II disorders. *Introductory* *Encyclopedia of Cognitive Behavior Therapy* Stephanie Felgoise, Arthur M. Nezu, Christine M. Nezu, Mark A. Reinecke, 2006-06-18
One of the hallmarks of cognitive behavior therapy is its diversity today. Since its inception over twenty five years ago, this once revolutionary approach to psychotherapy has grown to encompass treatments across the full range of psychological disorders. The *Encyclopedia of Cognitive Behavior Therapy* brings together all of the key aspects of this field, distilling decades of clinical wisdom into one authoritative volume. With a preface by Aaron T. Beck, founder of the cognitive approach, the *Encyclopedia* features entries by noted experts including Arthur Freeman, Windy Dryden, Marsha Linehan, Edna Foa, and Thomas Ollendick, to name but a few, and reviews the latest empirical data on first line therapies and combination approaches to give readers both insights into clients' problems and the most effective treatments available. Common disorders and conditions: anxiety, depression, OCD, phobias, sleep disturbance, eating disorders, grief, anger. Essential components of treatment: the therapeutic relationship, case formulation, homework, relapse prevention. Treatment methods: dialectical behavior therapy, REBT, paradoxical interventions, social skills training, stress inoculation, play therapy, CBT, medicine combinations. Applications of CBT with specific populations: children, adolescents, couples, dually diagnosed clients, the elderly, veterans, refugees. Emerging problems: Internet addiction, chronic pain, narcolepsy, pathological gambling, jet lag. All entries feature reference lists and are cross indexed. The *Encyclopedia of Cognitive Behavior Therapy* capably fills practitioners and educators' needs for an idea book, teaching text, or quick access to practical, workable interventions. *The Evolution of Cognitive Behavior Therapy* Donald Meichenbaum, 2017-02-17
The *Evolution of Cognitive Behavior Therapy: A Personal and Professional Journey* with Don Meichenbaum explores the untold story of how Cognitive Behavior Therapy emerged and discusses the controversies encountered along the way. This volume will feature a personal account of Don Meichenbaum's contributions from his initial work on self-instructional training with schizophrenics and impulsive children through his work on stress inoculation training and his most recent works with traumatized individuals. These previously published papers are complemented with updated papers and accompanying commentary. *Anger, Aggression, and Interventions for Interpersonal Violence* Timothy A. Cavell, Kenya T. Malcolm, 2023-05-31
Interpersonal violence has many faces and many names: domestic violence, child abuse, school bullying. *Anger, Aggression, and Interventions for Interpersonal Violence* reveals what clinical scientists know and what mental health

practitioners can do about interpersonal violence To advance the way professionals conceptualize interventions for violent clients contributors consider the complex relation between anger and aggression and discuss how that relation affects treating various forms of interpersonal violence Should treatment focus on anger on aggression or on both Does that decision depend on the form of interpersonal violence or does the anger aggression relation suggest a core set of intervention principles and strategies Readers are provided up to date detailed discussions as well as focused commentaries all written by internationally known researchers This volume will serve as a comprehensive guide for researchers and practitioners alike

with individuals who have persistent symptoms and perceptions that contribute to disability and to emotional distress. Many of these individuals benefit significantly from neuropsychological intervention. Case examples throughout the book illustrate the adaptation of cognitive behavioral and traditional psychotherapeutic approaches to individuals with mild to moderate brain injury. Self-regulation and self-management of both cognitive failures and emotional responses are described as appropriate and effective in this population.

Authentic Classroom Management Barbara Larrivee, 2005. It is essential for classroom teachers to be reflective. It is critical that they be aware of their own biases and prejudices. Larrivee does an excellent job of gently guiding the teacher through a look at his/her past. The first chapter creates a comfort zone with which the teacher continues to look at his/her past and consequently at his/her treatment of children. Dr. Patricia A. Pinter, St. Mary of the Woods College. *Authentic Classroom Management* addresses the basics of classroom management by narrowing the gap between theory and practice to provide realistic and collaborative management options. This easy-to-read practical text presents a broad theoretical background while focusing on the belief that effective classroom management requires careful preparation and goes beyond learning discrete skills. The text promotes a multi-dimensional and reflective perspective for managing classrooms that will prepare prospective and in-service teachers to successfully manage today's diverse classrooms. Highlighting a comprehensive range of strategies and philosophies, the text encourages alternative ways to support positive classroom behaviors. Its many exercises offer opportunity for skill development through reflection and self-questioning, emphasizing proactive ways of interacting with students to create and sustain a supportive learning community.
