G. H. Wells, L. W. Lherbier, 1980 On demand operators have more risk in their operating environments and receive less oversight from FAA For example one on demand operator we visited flew dozens of flights daily during the summer to take tourists to glaciers on which the aircraft landed and took off on skis This operator flies 17 aircraft and was inspected 8 times by FAA in 2008 In contrast a Part 121 operator with 10 aircraft overseen by the same FAA oversight office received 199 inspections in 2008 Industry and the National

Transportation Safety Board NTSB have made recommendations to strengthen on demand regulations While FAA has made efforts to improve safety and adapt its oversight to the increased complexity of industry operations it has not taken substantive action to address these recommendations Further FAA does not effectively target inspections to higher risk on demand operators The number of fatalities from on demand operations makes it imperative that FAA take action to address three issues we identified as it plans regulatory and oversight changes for the growing on demand operator industry
