Tutankhamun and Carter Rogerio Sousa, Gabriele Pieke, Tine Bagh, 2024-08-15 First scholarly multi disciplinary re assessment of Howard Carter s discovery and excavation of Tutankhamun s tomb and the impact of the find on our understanding of the material culture of Ancient Egypt The discovery of the tomb of Tutankhamun in 1922 stands out as one of the most important finds of modern archaeology revealing an enormous wealth of objects encapsulating techniques vestiges of uses and re uses of materials as well as unrivalled clues regarding the complex set of beliefs associated with the pharaonic funerary material culture Once cleared from the tomb these objects have captivated the world with their irresistible charm and beauty ending up playing a role in contemporary popular culture However it seems that such magnetism rather hindered than facilitated the scholarly study of the find One hundred years after the discovery of this

magnificent tomb most of its objects remain insufficiently studied to this day This volume aims to show how it remains challenging to study Tutankhamun's objects gathering a collection of studies authored by leading scholars on conservation materials funerary beliefs as well as the reception of motifs and the impact of the discovery Through these studies it becomes clear how ancient objects can help us reconstruct the complex fabric of the ancient Egyptian society and how they keep interacting with modern audiences

Rethinking Higher Education in Post-Apartheid South Africa Emnet Tadesse Woldegiorgis, Logan Govender, Dennis Zami Atibuni, 2025-07-25 This book explores the opportunities and epistemological and structural challenges facing higher education in postcolonial South Africa and argues for a fundamental transformation to meet the needs of the 21st century Taking the concept of transformation as a unifying thread this book discusses the evolving trajectories of higher education in South Africa with particular emphasis on the decolonial initiatives that have emerged in the post Apartheid era During this time there have been persistent calls for South Africa to move beyond Eurocentric education programmes and curricula in favour of a system that reflects the continent's culture and identities of all South Africans The book argues that incremental reforms of existing structures are insufficient and that instead a deeper more fundamental shift in higher education structures values and systems is needed Overall the book calls for a comprehensive transformation to expand access for historically disadvantaged communities enhance quality and competitiveness address past injustices and improve the quality and capacity to act together for a more sustainable and just future Also exploring the digital transformations which have accelerated in the wake of the COVID 19 pandemic this book will be an essential read for researchers and policymakers working on higher education in South Africa

Software Defined Networks Anand Nayyar, Bhawna Singla, Preeti Nagrath, 2022-06-21 SOFTWARE DEFINED NETWORKS Software defined networking suggests an alternative worldview one that comes with a new software stack to which this book is organized with the goal of presenting a top to bottom tour of SDN without leaving any significant gaps that the reader might suspect can only be filled with magic or proprietary code Software defined networking SDN is an architecture designed to make a network more flexible and easier to manage SDN has been widely adopted across data centers WANs and access networks and serves as a foundational element of a comprehensive intent based networking IBN architecture Although SDN has so far been limited to

automated provisioning and configuration IBN now adds translation and assurance so that the complete network cycle can be automated continuously aligning the network to business needs In 14 chapters this book provides a comprehensive understanding of an SDN based network as a scalable distributed system running on commodity hardware The reader will have a one stop reference looking into the applications architectures functionalities virtualization security and privacy challenges connected to SDN Audience Researchers in software IT and electronic engineering as well as industry engineers and technologists working in areas such as network virtualization Python network programming CISCO ACI software defined network and cloud computing *Popular Fads and Crazes through American History* Nancy Hendricks,2018-08-17 This informative two volume set provides readers with an understanding of the fads and crazes that have taken America by storm from colonial times to the present Entries cover a range of topics including food entertainment fashion music and language Why could hula hoops and TV westerns only have been found in every household in the 1950s What murdered Russian princess can be seen in one of the first documented selfies taken in 1914 This book answers those questions and more in its documentation of all of the most captivating trends that have defined American popular culture since before the country began Entries are well researched and alphabetized by decade At the start of every section is an insightful historical overview of the decade and the set uniquely illustrates what today s readers have in common with the past It also contains a Glossary of Slang for each decade as well as a bibliography plus suggestions for further reading for each entry Students and readers interested in history will enjoy discovering trends through the years in such areas as fashion movies music and sports

The Authoritarian International Stephen G. F. Hall,2023-05-25 Stephen Hall argues that democracies can preserve their norms and values from increasing attacks and backsliding by better understanding how authoritarian regimes learn He focuses on the post Soviet region investigating two established authoritarian regimes Belarus and Russia and two hybrid regimes Moldova and Ukraine with the aim of explaining the concept of authoritarian learning and revealing the practices that are developed and the sources of that learning Hall finds clear signs of collaboration between countries in developing best survival practices between authoritarian minded elites and demonstrates that learning does not just occur between states rather it can happen at the intra state level with elites learning lessons from previous regimes in their own countries He highlights the horizontal nature of this learning with authoritarian minded elites developing methods from a range of sources to ascertain the best practices for survival Post Soviet regional organisations are crucial for the development and sharing of these survival practices as they provide learning rooms and training exercises **Treasured** Christina Riggs,2022-02-01 A bold new history of the discovery of King Tut and the seismic impact it left on modern society When it was discovered in 1922 in an Egypt newly independent of the British Empire the 3 300 year old tomb of Tutankhamun sent shockwaves around the world The boy king became a household name overnight and kickstarted an international obsession that continues to this day From pop culture and politics to tourism and the heritage industry it s impossible to imagine the

past century without the discovery of Tutankhamun yet so much of the story remains untold In Treasured Christina Riggs weaves compelling historical analysis with tales of lives touched or changed forever by an encounter with the boy king Who remembers that Jacqueline Kennedy first welcomed the young pharaoh to America That a Tutankhamun revival in the 1960s helped save the ancient temples of Egyptian Nubia Or that the British Museum s landmark Tutankhamun exhibition in 1972 remains its most successful ever But not everything about King Tut glitters tours of his treasures in the 1970s were linked to Big Oil his mummified remains have been exploited in the name of science and accounts of his tomb s discovery exclude Egyptian archaeologists Treasured offers a bold new history of the young pharaoh who has as much to tell us about our world as his own **Self-Assembled Organic-Inorganic Nanostructures** Christian von Borczyskowski, Eduard

Zenkevich, 2017-03-27 The current state and perspectives in natural and life sciences are strongly linked to the development of novel complex organic inorganic materials at various levels of organization including semiconductor quantum dots QDs and QD based nanostructures with unique optical and physico chemical properties This book provides a comprehensive description of the morphology and main physico chemical properties of self assembled inorganic dye nanostructures as well as some applications in the field of nanotechnology It crosses disciplines to examine essential nanoassembly principles of QD interaction with organic molecules excited state dynamics in nanoobjects theoretical models and methodologies Based on ensemble and single nanoobject detection the book quantitatively shows for the first time on a series of nanoassemblies that surface mediated processes formation of trap states dictate the probability of several of the most interesting and potentially useful photophysical phenomena FRET or non FRET induced quenching of QD photoluminescence observed for colloidal QDs and QD dye nanoassemblies Further nanostructures can be generated by nanolithography and thereafter selectively decorated with dye molecules A similar approach applies to natural nanosized surface heterogeneities Oromo Indigenous Religion and Oromo Christianity Ujulu Tesso Benti, 2018-05-31 The early non Oromo writers have distorted the history of the Oromo Without scientific research they were speaking of the so called Oromo migration of the 16th century Against the

unscientific thesis of the early scholars this work confirmed the Oromo to be not only the indigenous African peoples but also belong to the Cushitic Africans who invented the first world civilization Their egalitarian and holistic culture the gadaa system is part of the ancient Cushitic civilization It is the base for modern democratic system of governance The root word of gadaa is originated from Ka the creator God of the ancient religion of the Cushitic Africans From this very name Ka originated the Oromo word Waaqa which also means creator of everything This shows that the Oromo are among the first nations who came up with the idea of monotheism Therefore this work disqualifies the missionary assumptions describing the Oromo Indigenous Religion OIR as Satanism and its religious experts the Qaalluus as witchdoctors or sorcerers This dissertation discovered many identical similar partial similar and few differing elements between the Oromo Indigenous Religion OIR and Oromo Christianity OC Also the study identified many Oromo cultural elements that are compatible to

Christianity therefore must be adopted by the Oromo Christianity According modern scholarship God revealed himself in every human culture and religion is part of human culture Therefore no religion can claim to be the only true religion Based on this principle this dissertation calls all leaders of religious institutions in Oromia to change their attitude develop culture of tolerance conduct constructive religious dialogue create the atmosphere of peaceful coexistence of all religions and establish sustainable peace that serves humanity

Artificial Intelligence, Internet of Things (IoT) and Smart Materials for Energy Applications Mohan Lal Kolhe,Kailash J. Karande,Sampat G. Deshmukh,2022-10-12 This reference text offers the reader a comprehensive insight into recent research breakthroughs in blockchain the Internet of Things IoT artificial intelligence and material structure and hybrid technologies in their integrated platform while also emphasizing their sustainability aspects The text begins by discussing recent advances in energy materials and energy conversion materials using machine learning as well as recent advances in optoelectronic materials for solar energy applications It covers important topics including advancements in electrolyte materials for solid oxide fuel cells advancements in composite materials for Li ion batteries progression of materials for supercapacitor applications and materials progression for thermochemical storage of low temperature solar thermal energy systems This book Discusses advances in blockchain the Internet of Things artificial intelligence material structure and hybrid technologies Covers intelligent techniques in materials

progression for sensor development and energy material characterization using signal processing Examines the integration of phase change materials in construction for thermal energy regulation in new buildings Explores the current happenings in technology in conjunction with basic laws and mathematical models Connecting advances in engineering materials with the use of smart techniques including artificial intelligence machine learning and Internet of Things IoT in a single volume this text will be especially useful for graduate students academic researchers and professionals in the fields of electrical engineering electronics engineering materials science mechanical engineering and computer science
