Trundle,2005

Astronomer Carl Sagan believed that modern physics was not discovered centuries earlier because it was deterred by

religious superstition suggesting that ET's advanced civilization would be due to an unbiased pursuit of science. Human pride and an imposition of politics on science are the best explanations for impeded scientific progress and a closed mindedness to the most astonishing possibility in history that ET is here. The first philosopher to have written both a professional article and book in support of ET's probable presence Dr Trundle combines his expertise in Ethics Politics and Theology with an impressive array of material from UFOlogists and military experts to argue that ET has in fact been around for quite some time. Illustrated throughout b/w Includes a momentous admission from C McClelland former ScO Space Shuttle Fleet Kennedy Space Center 1958 1992

The God Hypothesis Joe Lewels, 1997 The God Hypothesis offers a bold look at the alien abduction phenomena and challenges not only commonly accepted UFO theories but also the modern theological and scientific consensus views of reality. By thoroughly examining evidence from various scientific disciplines Dr Lewels presents a compelling case for the reality of UFOs and their connection to the major religions of the world. In so doing he causes us to re-examine our own spiritual and religious beliefs and to see the Bible through modern scientific eyes a view that demystifies the ancient texts and reveals the true origins of the human race and its proper place in the hierarchy of intelligent life in the universe. Lewels sees the UFO enigma as part of the process of human evolution in the physical sense as well as in the spiritual. He proposes a solution that crosses the line between the physical material world and that spiritual dimension where quantum physics tells us that time and space cease to exist.

Freaky Truths About God & Evolution Harold Stewart, 2014-09-12 Theologians philosophers and scientists all have differing views of the world but what is the real abiding reality? Most are afraid to cross the streams so to speak of these distinct disciplines but suppose we could gather together a group of these adherents to discuss the questions that people consider to taboo to talk about in public like the relationship of faith fact or fantasy. Where would that conversation its tangents or derivatives lead? This book attempts to answer those questions of the mind that every rational person has at some point in their life. To do that we must engage in discussions about reality absurdity perception Truth consciousness as well as Godel's preverbal incompleteness. While discussing the origin of the cosmos the topic will migrate from Transformers and UFO's to how multidimensionality could be related to miracles. The theme of the book examines the freaky truths of the relationship of these divergent disciplines and beliefs. As such the main characters will be the Sovereign of the Universe and His history verses that of the scientific and philosophical communities. In answering the Problem of Evil alone worth the cost we invariably meet the Hostis humani generis the enemy of humanity Satan. Hopefully a rocking good time will be had by everyone who ventures to buy the book. P.S. Don't be surprised if you find a few spooky parts as well.
