Globalization in State Socialist East Central Europe Béla Tomka, 2024-07-20 This open access Palgrave Pivot explores four major aspects of globalization foreign trade capital and information flows and the movement of people The book examines how the state socialist countries of East Central Europe fit into the general trend of globalization after WWII It focuses on three specific countries in the region Poland Czechoslovakia and Hungary The study also considers conceptual problems whether recently introduced terms such as alternative globalization and socialist proto globalization are plausible for interpreting state socialist globalization Special attention is paid to the study of continuities and discontinuities in the process of globalization in East Central Europe which is a key issue in current debates This requires a long term perspective so the study covers not only the decades before 1989 but also subsequent developments In doing so the book attempts to find a balance between old and new mainstream interpretations it recognises that East Central European societies experienced considerable globalization during the state socialist era however based on empirical findings instead of alternative or proto globalization the book suggests other notions to conceptualise this process including fragmentation selectivity and unevenness Thus the proposed understanding could also contribute to discussions on globalization beyond East Central Europe
