School Mathematics Curricula Catherine P. Vistro-Yu, Tin Lam Toh, 2019-04-26 This book sheds light on school mathematics curricula in Asian countries including their design and the recent reforms that have been initiated. By discussing and analyzing various problematic aspects of curriculum development and implementation in a number of East and South Asian countries and offering insights into these countries' unique approaches to supplementing school mathematics curricula, it contributes to shaping effective policies for implementation, assessment, and monitoring of curricula. The book covers a wide range of issues: curriculum design, localization of curricula, directions of curricular reforms, mathematics textbooks, assessment within the curriculum, and teachers' professional development, which are of interest to a wide international audience.

Engineering and Sciences Teaching and Learning Activities Samsul Ariffin Abdul Karim, Saiful Azmi Husain, 2021-08-25 This book comes from genuine research from various universities in Asia such as in South East Asia and India. Since COVID 19 pandemic is spreading all over the world, most schools and institutions of higher learning have opted online-based learning for their teaching and learning T L activities. Previously, the common practices in T L are face-to-face F2F. Therefore, online T L is a new normal, not just for the students but also for the instructors as well as the parents. In this book, different online teaching methods via technology-supported teaching have been implemented, and at the end of the lesson, based on the feedback from students on these online technology-supported teaching tools, most educators found that there are positive responses from the majority of students in terms of their learning attitudes, thinking, and decision-making process, apart from the challenges faced by the students in the beginning with regards to the new approaches and methodology used by their teachers during online teaching. There are eight contributed chapters in this book covering secondary school level curriculum up to higher institutional level curriculum that forming a new system of T L for post COVID 19 pandemic. The topics under consideration include active learning AL and cooperative learning CL for T L task-based instruction, TBI, transition students' adaptability to post COVID 19 creative and innovative teaching methods for secondary school level mathematics, project-based learning PPBL for geophysics, and impact of Socratic method and SOLO taxonomy. This book is suitable for postgraduate students, teachers, instructor, educational researchers, as well as policy makers in education and other scientists who are dedicated in teaching and educate students.
