Thinking Recording And Writing History In The Ancient World:

Thinking, Recording, and Writing History in the Ancient World Kurt A. Raaflaub, 2013-11-08 Thinking Recording and Writing History in the Ancient World presents a cross cultural comparison of the ways in which ancient civilizations thought about the past and recorded their own histories Written by an international group of scholars working in many disciplines Truly cross cultural covering historical thinking and writing in ancient or early cultures across in East South and West Asia the Mediterranean and the Americas Includes historiography shaped by religious perspectives including Judaism early Christianity Islam and Buddhism Record-Making and Record-Keeping in Early Societies Geoffrey Yeo, 2021-04-21 Record Making and Record Keeping in Early Societies provides a concise and up to date survey of early record making and record keeping practices across the world It investigates the ways in which human activities have been recorded in different settings using different methods and technologies Based on an in depth analysis of literature from a wide range of disciplines including prehistory archaeology Assyriology Egyptology and Chinese and Mesoamerican studies the book reflects the latest and most relevant historical scholarship Drawing upon the author s experience as a practitioner and scholar of records and archives and his extensive knowledge of archival theory and practice the book embeds its account of the beginnings of recording practices in a conceptual framework largely derived from archival science Unique both in its breadth of coverage and in its distinctive perspective on early record making and record keeping the book provides the only updated and synoptic overview of early recording practices available worldwide Record Making and Record Keeping in Early Societies will be of interest to academics researchers and students engaged in the study of archival science archival history and the early history of human culture The book will also appeal to practitioners of archives and records management interested in learning more about the origins of their profession **Kizzuwatna. History of Cilicia in the Middle and Late Bronze Age (ca. 2000-1200 BC)** Andrea Trameri, 2024-10-21 In Kizzuwatna Andrea Trameri presents a history of the kingdom of Kizzuwatna located in Cilicia southern Anatolia from its origins to the fall of the Hittite Empire Encompassing both philological and archaeological evidence in the discussion this book is the first comprehensive historical study of interdisciplinary scope dedicated to Kizzuwatna and the region of Cilicia in the second millennium BC The book presents and re analyses a diverse array of sources and data providing an updated overview of various topics of interest beyond political history including historical geography culture and religion population and language Some new findings and proposals further contribute to an improved understanding of the history of the Hittite kingdom and other neighboring regions in the Middle and Late Bronze Age ca 2000 1200 BC **Historical Experience** David Carr, 2021-03-30 This volume brings together a collection of recent essays on the philosophy and theory of history This is a field of lively interdisciplinary discussion and research to which historians philosophers and theorists of culture and literature have contributed The author is a philosopher by training and his inspiration comes primarily from the continental phenomenological tradition Thus the influence of Husserl Heidegger

Merleau Ponty and Ricoeur can be discerned here This background opens up a unique perspective on the issues under discussion Phenomenology differs from other philosophical approaches like metaphysics and epistemology Phenomenology asks of anything that exists or may exist how is it given how does it enter our experience what is our experience of it like Very broadly we can say phenomenology is about experience At first glance this approach may seem ill suited to history In our language history usually means either 1 what happened i e past events or 2 our knowledge of what happened We can't experience past events and whatever knowledge we have of them must come from other sources memory testimony physical traces But the author maintains that we actually do experience historical events and these essays explain how this is so Sitting at the intersection of philosophy and history and divided into three parts Historicity Narrative and Time Teleology and History and Embodiment and Experience this is the ideal volume for those interested in experience from a philosophical and historical perspective
