Postmodern Imperialism Eric Walberg, 2011-06-09 Eric Walberg's POSTMODERN IMPERIALISM Geopolitics and the Great Game is a riveting and radically new analysis of the imperialist onslaught which first engulfed the world in successive waves in the 19th 20th centuries and is today hurtling into its endgame The term Great Game was coined in the nineteenth century reflecting the flippancy of statesmen and historians personally untouched by the havoc that they wreaked What it purported to describe was the rivalry between Russia and Britain over interests in India But Britain was playing its deadly game across all of Eurasia from the Balkans and Palestine to China and southeast Asia alternately undermining and carving up premodern states disrupting the lives of hundreds of millions with consequences that endure today With roots in the European enlightenment shaped by Christian and Jewish cultures and given economic rationale by industrial capitalism the inter imperialist competition turned the entire world into a conflict zone leaving no territory neutral The first game was brought to a close by the cataclysm of World War I But that did not mark the end of it Walberg resurrects the forbidden word to scrutinize an imperialism now in denial but following the same logic and with equally horrendous human costs What he terms Great Game II then began with America eventually uniting its former imperial rivals in an even more deadly game to destroy their common revolutionary antagonist and potential nemesis communism Having won this game America and the new player Israel offspring of the early games have sought to entrench what Walberg terms empire and a half on a now global playing field using a neoliberal agenda backed by shock and awe With swift sure strokes Walberg paints the struggle between domination and resistance on a global canvas as imperialism engages its two great challengers communism and Islam its secular and religious antidotes Paul Atwood War and Empire The American Way of Life calls it an epic corrective It is a carefully argued and most of all cliché smashing road map according to Pepe Escobar journalist Asia Times Rigorously documented it is a valuable resource for all those interested in how imperialism works and sure to spark discussion about the theory of imperialism according to John Bell Capitalism and the Dialectic

thoroughly revised and updated to take into account new issues which have become salient in the period since the first and second editions were published Several new chapters have been added and others combined or re written to assess the growing supra national regionalization of the international economy the emergence of India and China as new super powers and the possibilities for the continued governance of the global system A new author has been added to strengthen the analytical embrace of the book given the untimely death of Paul Hirst in 2003 Globalization in Question s third edition is a continuing intervention into current discussions about the nature and prospects of globalization The book has far reaching implications which will be of interest to students and academics in a number of disciplines including politics sociology economics and geography as well as to journalists and policy makers

Examining Treasury's Role in Combating Terrorist Financing Five Years After 9/11 United States. Congress. Senate. Committee on Banking, Housing, and Urban Affairs,2009

Borrowing Through the U.S. Treasury's "Fast Money Tree" Dr. Michael William Sunner,2012-07-27 The continuing U S Governments debt ceiling crisis is an anomaly characterized by a dysfunctional Congress that previously approved the budgetary expenditures for a multitude of government programs that now requires that same body to approve raising the ceiling to pay for those same program expenditures The U S Treasury then dutifully raises the necessary cash to pay these bills and maturing debt through selling auctioning an ample supply of various marketable debt securities bills notes bonds and TIPS through Treasurys Fast Money Tree Treasury s goal is to sell or auction its securities at the lowest possible cost to the taxpayer in order to finance the U S government s operations and make up the difference between government revenues taxes fees etc and the actual program costs To accomplish this essential mission Treasury sells through approximately 280 300 auctions each year approximately 7 to 8 trillion in marketable debt in the global financial markets to 21 Primary Dealers and over 200 other entities that include foreign central banks and hundreds of thousands of retail investors through a remarkably fast efficient and robust electronic system the Treasury Automated Auction System TAAPS which I refer to as the Fast Money Tree Simply put Republicans want to decrease government borrowing and spending without raising taxes to stimulate economic growth and Democrats want to also decrease government borrowing and spending while increasing revenues e g taxes on the very wealthy and ensuring that everyone pay their fair share of taxes This book also argues for a sensible balance between spending cuts and increased revenues in order to promote economic growth In any case the Fast Money Tree must persist in carrying out its essential mission to raise the cash needed so the U S Governments essential government operations can continue unabated
