Transforming for stabilization and reconstruction operations , **Transforming for Stabilization and Reconstruction Operations** Hans Binnendijk, Stuart E. Johnson, 2004 *Transforming for Stabilization and Reconstruction Operations* Hans Binnendijk, Stuart Johnson, 2012-07-23 Recent military operations in Afghanistan and Iraq were characterized by the rapid defeat of enemy military forces by relatively small deployments of American forces and by a very limited destruction of the critical civilian infrastructure This success can be credited in large part to the ongoing transformation of the U S military evident in its effective use of information superiority precision strike and rapid maneuver on the battlefield Reshaping the Expeditionary Army to Win Decisively: The Case for Greater Stabilization Capacity in the Modular Force , 2005 Today the U S Army is decisively engaged in both fighting an unfamiliar type of war and transforming itself to meet the challenges of future warfare But what are those challenges What capabilities does U S strategy demand of its military instrument Where are the major capability gaps and how should they inform Army Transformation to ensure the future expeditionary Army has the right campaign qualities This paper argues that the major capability gap in today s force and vital for future campaigns is the ability to conduct stabilization It begins with exploring the changes in U S strategy that are the impetus behind the need for greater capacity to conduct post conflict stabilization and reconstruction Then it analyzes the emerging role of the Army in post conflict operations in the context of modern combat to more fully understand the specific requirements of stabilization The paper then develops an operational concept progressive stabilization that complements the Army s concept of rapid decisive operations while improving its ability to contribute to long term conflict resolution It outlines three key force attributes an expeditionary force structure must have to provide the requisite mix of combat and stabilization capabilities Finally this paper builds on those attributes to suggest three areas where Army leaders must make near term adjustments in the Modular Force to ensure the nation has a truly expeditionary force with the campaign capacity for both rapid decisive operations and stabilization A Nation at War in an Era of Strategic Change , Peacekeeping and Stability Issues Keith D. Gerbick, Marjorie Ann Browne, Nina M. Serafino, Martin A. Weiss, 2007 As the international political climate grows increasingly volatile peacekeeping operations have become a mainstay in troubled regions The alternative to military occupation is either to train indigenous police forces or to hire security corporations Policy makers are worried that these forces are not capable of maintaining peace In addition moral and legal issues are factors for policy makers that are debating the extent to which peacekeeping forces should be allowed to infiltrate societies in turmoil Other issues of concern that this book examines are the United States relationship with the U N and the World Bank as all three pursue their different responsibilities in peacekeeping *U.S. Army War College Guide to National Security Issues: National security policy and strategy* J. Boone Bartholomees, 2008 The U S Army War College Guide USAWC to National Security Issues is the latest edition of the U S Army War College Guide to National Security Policy and Strategy which the

college has published sporadically under different titles since 2001 This edition of the Guide is in two volumes that correspond roughly to the two core courses that the Department of National Security and Strategy DNSS teaches Theory of War and Strategy and National Security Policy and Strategy Page vii *Peacekeeping and Related Stability Operations* Nina M. Serafino, 2005 One of the most crucial and difficult tasks in peacekeeping and related stability operations is creating a secure and stable environment both for the foreign peacekeepers and for the indigenous population During the past decade the United States and the international community have tried various approaches to providing that security Most of these approaches have included the use of United Nations International Civilian Police UNCIVPOL whose forces are contributed on a case by case basis by UN member states While other countries usually contribute police personnel from their own national forces the United States contracts those it contributes through a private corporation In a few cases such as Afghanistan and Iraq at this time coalition and US military forces and not the United Nation train and work with indigenous police forces to provide security This book presents an up to date evaluation of current issues in peacekeeping The U.S. Army War College Guide to National Security Issues ,2010 **A Nation at War in an Era of Strategic Change** Williamson Murray, 2004 The President Secretary of Defense and the Army s Chief of Staff have all stated that the United States is a Nation at War The U S military faces significant strategic challenges as it continues to transform the force and improve interagency integration into joint operations all the while engaging in active combat operations associated with the Global War on Terrorism This collection of outstanding essays three of which won prestigious writing awards by the students enrolled in the Army War College s Advanced Strategic Art Program ASAP highlight some of these strategic challenges and offer thoughtful solutions They provide insights that will undoubtedly prove useful to decisionmakers at the highest levels of our national security establishment ASAP graduates continue to make their mark as outstanding theater strategists in the Office of the Secretary of Defense the Joint Staff and Army Staff and in the Combatant Commands
