Solecki, Patricia Romero-Lankao, Shagun Mehrotra, Shobhakar Dhakal, Somayya Ali Ibrahim, 2018-03-29 The Urban Climate Change Research Network's Second Assessment Report on Climate Change in Cities ARC3 2 is the second in a series of global science based reports to examine climate risk adaptation and mitigation efforts in cities The book explicitly seeks to explore the implications of changing climatic conditions on critical urban physical and social infrastructure sectors and intersectoral concerns The primary purpose of ARC3 2 is to inform the development and implementation of effective urban climate change policies leveraging ongoing and planned investments for populations in cities of developing emerging and developed countries This volume like its predecessor will be invaluable for a range of audiences involved with climate change and cities mayors city officials and policymakers urban planners policymakers charged with developing climate change mitigation and adaptation programs and a broad spectrum of researchers and advanced students in the environmental sciences Oversight of Federal Efforts for Rail and Surface Transportation Security United States. Congress. Senate. Committee on Commerce, Science, and Transportation, 2010 *Security and Environmental Sustainability of Multimodal Transport* Michael Bell, Solmaz Haji Hosseinloo, Urszula Kanturska, 2010-06-07 Not until the recent attacks on transport systems has transport security become a focus of public concern and academic research Various aspects of transport security have already been analysed under different agendas Some research was focused on the potential risk to the environment resulting from transport in particular from the transport of hazardous or dangerous goods while other research considered critical elements of transport networks or supply chains as vital lifelines in the case of natural disasters Recently new threats stimulated interest in transport security as a stand alone issue placing it at

the forefront of political and academic agendas A NATO Advanced Research Workshop held at Imperial College London in January 2009 brought together those with expertise in the above mentioned fields in order to verify the current state of knowledge in the field and identify promising areas for future work The workshop concentrated on maritime and intermodal transport risk management and long term strategic planning rather than on the details of monitoring or detection techniques This collection of papers emanates largely from that workshop While transport systems are widely recognized as terrorist targets complete protection of these systems is economically and practically infeasible The workshop looked at analytical methods to identify critical points in the transport infrastructure and the prioritization of defensive and mitigating measures given the limited resources available Deficiencies in methods for conducting such an assessment were identified and the need for cost effective mitigation measures was emphasized
