Further, electronic communication can be used to reduce human-induced variability and to improve the accuracy of data. The use of electronic data collection systems has been shown to reduce the variability of data collection in a laboratory setting (Hart, 1992). In addition, electronic data collection systems can be used to collect data from multiple sources, such as sensors, cameras, and microphones, and to integrate the data into a single database. This can be useful for analyzing data from multiple sources and for identifying trends and patterns in the data.
