Unreason Kendrick Frazier, Benjamin Radford, 2023-10-17 *UNREASON Exploring Pseudoscience Conspiracies and Extraordinary Claims* is a collection of forty-five of the best articles the legendary *Skeptical Inquirer* magazine has published in the past decade Featuring articles from writers including Neil deGrasse Tyson on the process of science Richard Dawkins on the standards of truth Elizabeth Loftus on memory Steven Pinker on the notion of progress and many others covering topics from the politicization of science to the frightening rise of misinformation each entry in this collection brings scientific examination to bear in order to ferret out the facts and misconceptions behind popular claims All of the articles within are interesting and readable Yet they are also quite diverse Some articles reinforce and complement each other others as happens in science may voice disagreements or differing perspectives But they all have one thing in common a respect for evidence a demand for the best most well tested most scientifically reliable information Readers will learn Why and how conspiracy rumors start spread and readily gain believers How to stay afloat in a sea of disinformation and survive the age of misinformation Why and how we form beliefs and adhere to them so powerfully How and why memory is fallible and what we can do about it How pseudoexperiments mislead the public about science *Unreason* will arm readers with scientific knowledge to curb the misinformation and misconceptions that increasingly threaten our civil discourse Even further these essays present a way for us to be better citizens equipped to deal with the winds of misinformation and disinformation swirling about us and better able to look ahead to a world where science and reason indeed just good old common sense can prevail

Life Driven Purpose Dan Barker, 2015-04-01 Every thinking person wants to lead a life of meaning and purpose For thousands of years holy books have told us that such a life is available only through obedience and submission to some higher power Today the faithful keep popular devotionals and tracts within easy reach on bedside tables and mobile devices all communicating this common message Life is meaningless without God In this volume former pastor Dan Barker eloquently powerfully and rationally upends this long held belief Offering words of

enrichment emancipation and inspiration he reminds us how millions of atheists lead happy loving moral and purpose filled lives Practicing what he preaches he also demonstrates through his own personal journey that life is valuable for its own sake that meaning and purpose come not from above but from within

Freedom From Religion in 30 Days: A REAL Wellness Approach to Critical Thinking, Exuberance and Personal Freedoms Contributors include Annie Laurie Gaylor, Dan Barker, Gerrie Paino, Carol Ardell and 109 luminaries whose work is briefly cited to support or inform the material in the book, 2022

This book is a 30 Day plan for gaining more freedom from religion Freedom From Religion in 30 Days FFR is an antidote for anti democratic tendencies irrationality tribalism and intolerance It also offers relief from the mental constraints of dogmas creeds and superstitions Religion as promoted by Christian Nationalists obstructs and threatens our wellbeing and freedoms Christopher Hitchens best seller God Is Not Great How Religion Poisons Everything seems increasingly apt In FFR a case is made that religions poison not quite everything but more than enough to make it a mental health and quality of life hazard Whether you re a believer a devout freethinker or someone in between you will find each of the 30 days meets three standards 1 engaging 2 entertaining and 3 informative My goal is that FFR will hold your attention for a solid month and benefit you even longer WHY IT MATTERS FFR is about breaking away from the false claims and destructive effects of religion It s also about the positive nature of a REAL wellness way to think more critically live more exuberantly and enjoy more personal liberties A large number of freedoms are available for the taking once mental constraints of creeds and dogmas are eliminated This book promotes 1 Science based critical thinking using reason to guide important decisions Few decisions are as important as what you believe about religions especially the one in which you were indoctrinated 2 Happiness joy fun adventure meaning and purpose in life These are the key elements in the REAL wellness dimension of exuberance 3 Freedom to live the kind of life you desire This is the liberty dimension of REAL wellness THE 30 DAY FORMAT All 30 essays address some aspect of religion as it affects mental freedoms that shape values commitments beliefs behaviors and ultimately quality of life and wellbeing The format is inspired by Wilfred Funk s 30 Days to a More Powerful Vocabulary Within the 30 essays are four self evaluations focused upon reason exuberance personal liberties and management of stress Over 30 topics are covered in the essays though religion is a theme throughout The topics besides religion in general and Christianity in particular include politics heroic freethinkers mountebanks dubious and needed holidays ethics prayers play commandments parenting happiness sexuality doubt aging and death In addition to informing and entertaining FFR advances skills and awareness needed to slow the frightful trends that threaten our national interests THE PRISON OF BELIEF Although Christianity no longer has the power it wielded in the Middle Ages and thus no longer engages in atrocities such as the Inquisition s auto de f carnival like public executions of heretics it has another insidious liability it imprisons the brains of adherents thereby diminishing our democracy and crippling our personal freedoms and opportunities for exuberant lives James Haught put it this way When people accept supernatural claims of a religion their lives are altered They commit

themselves to belief in miracles prophecies and similar magic which orients their view of reality It confines them hindering their ability to consider other possibilities This narrowed lifestyle can be called the prison of belief This book will delight you if you re no longer willing to go along with pabulum babble in ritual blather such as In God we trust so help me God or God bless America TABLE OF CONTENTS DEDICATION PRAISE FOR FREEDOM FROM RELIGION FOREWORD INTRODUCTION THE 30 DAYS FOR FREEDOM FROM RELIGION Day 1 Questions To Guide A REAL Wellness Philosophy and Lifestyle Day 2 Religion and Wellbeing Day 3 Perspectives on Radical Islam and Christian Nationalism Day 4 Doubt A Vital Quality for Effective Decision Making Day 5 Why Catholics Should Consider Leaving the Church Day 6 An Upgrade from 10 Commandments to 10 REAL Commitments Day 7 Use Your Mind and You Will Find Nothing Fails Like Prayer Day 8 The National Day of Prayer Or a National Day of Reason Day 9 Exceptional People the Winter Solstice and Christmas Day 10 Self Evaluation to Estimate Your Experience of Reason Day 11 It s Difficult to be Well but w a Little Bit of Luck You Might Day 12 A REAL Wellness Take on Ethics Day 13 Robert G Ingersoll Day 14 Play An Under Utilized Element in Education and Adult Life Day 15 Self Evaluation of Stress Awareness and Management Day 16 Exuberant Skepticism A Safeguard Against Pleasant Illusions Day 17 Dysfunctional Belief Systems and Anxieties Magical Thinking Day 18 Life Is Meaningless A Liberating REAL Wellness Perspective Day 19 Nothing Is Sacred Day 20 Self Evaluation to Estimate Your Experience of Exuberance Day 21 Sexuality From a REAL Wellness Perspective Day 22 A REAL Perspective on the Satanic Temple Day 23 Real Wellness Or Religion Choose Freedom Not Dogma Day 24 Guiding Children Toward Critical Thinking and Mental Freedom Day 25 Happiness REAL Wellness Perspectives on Enjoying Life Day 26 Reason Based Alternatives To Alcoholics Anonymous Day 27 Which Will Come First The Rapture Or the Demise of Religion Day 28 Celebrate Those Who Promote Reason Science Not Superstition Day 29 How to Die Healthy Day 30 Self Evaluation to Estimate Experience of Personal Freedoms RECOMMENDED READING ACKNOWLEDGEMENTS SPECIAL ACKNOWLEDGEMENT TO EVERYONE LIVING AND DEAD WHOSE WORDS ARE QUOTED IN FREEDOM FROM RELIGION IN 30 DAYS Critical Thinking for Strategic Intelligence Katherine Hibbs Pherson,Randolph H. Pherson,2020-08-14 With Critical Thinking for Strategic Intelligence Katherine Hibbs Pherson and Randolph H Pherson have updated their highly regarded easy to use handbook for developing core critical thinking skills and analytic techniques This indispensable text is framed around 20 key questions that all analysts must ask themselves as they prepare to conduct research generate hypotheses evaluate sources of information draft papers and ultimately present analysis including How do I get started Where is the information I need What is my argument How do I convey my message effectively The Third Edition includes suggested best practices for dealing with digital disinformation politicization and AI Drawing upon their years of teaching and analytic experience Pherson and Pherson provide a useful introduction to skills that are essential within the intelligence community **The HEAD Game** Philip Mudd,2015-03-31 Become a High Efficiency Analytic Decision maker We ve all been there faced with a major decision yet

overwhelmed by the very data that is supposed to help us. It's an all too common struggle in the digital age when Google searches produce a million results in a split second and software programs provide analysis faster than we could ever hope to read it. Adapting the geopolitical and historical lessons gleaned from over two decades in government intelligence, Philip Mudd, an ex-National Security Council staff member and former senior executive at the FBI and the CIA, finally gives us the definitive guidebook for how to approach complex decisions today. Filled with logical yet counterintuitive answers to ordinary and extraordinary problems, whether it be buying a new home or pivoting a failing business model, Mudd's HEAD (High Efficiency Analytic Decision making) methodology provides readers with a battle-tested set of guiding principles that promise to bring order to even the most chaotic problems, all in five practical steps. What's the question? Analysts often believe that questions are self-evident, but focusing on better questions up front always yields better answers later. What are your drivers? The human mind has a hard time juggling information, so analysts need a system to break down complex questions into different characteristics or drivers. How will you measure performance? Once the question has been solidified and the drivers determined, an analyst must decide what metrics they will use to understand how a problem and their solution to it is evolving over time. What about the data? Rather than looking at each bit of information on its own and up front, an analyst can only overcome data overload by plugging data into their driver categories and excising anything that doesn't fit. What are we missing? Complex analysis isn't easy, so it is imperative to assume that the process is flawed while also knowing how to check for possible gaps and errors, such as availability bias, halo effects, and intuitive versus analytic methodologies. Drawing deeply from his own harrowing experiences and mistakes in the line of duty, Mudd has spent years refining and teaching his methodology to Fortune 500 companies and government organizations. Now, in the best-selling tradition of Charles Duhigg's *The Power of Habit* and Oren Klaff's *Pitch Anything*, Philip Mudd's *The HEAD Game* can change the way you both live and work.

Golf Beneath the Surface Raymond Prior, PHD, 2023-05-09. An essential resource for golfers who want to play a smarter, more fulfilling game on the green. For as long as golf has existed, the game's greatest players and instructors have lauded the importance of mental resilience. However, while golfing equipment and course strategy have evolved over time, the field of golf psychology has not kept pace. Many outdated, unscientific notions remain widespread despite the fact that they actually lead to repetitive, harmful patterns that impair golfer gameplay and create mental barriers to success. In *Golf Beneath the Surface*, performance consultant Dr. Raymond Prior expertly debunks these surface-level psychology myths and explains psychological predictors that encourage long-term growth and skillful performance under pressure. Backed by rigorously researched neuroscience and psychology and drawing on years of experience working with some of the world's best players, Dr. Prior shares fresh, practical insights into how golfers think, train, and play both on and off the course. With a customizable experience that places the reader's own psychology front and center, this book breaks down how the brain's design impacts their performance, how to interact with their own thoughts and emotions, and train awareness for the present.

moment how to understand and effectively change unproductive habits the critical importance of their psychological framework and how to shape beliefs that cultivate and support steady confidence Accessible and entertaining *Golf Beneath the Surface* challenges the status quo and brings a long overdue update to modern performance psychology Good Thinking Guy P. Harrison, 2015 Critical thinking skills are essential for life in the 21st century In this follow up to his introductory guide *Think* and continuing his trademark of hopeful skepticism Guy Harrison demonstrates in a detailed fashion how to sort through bad ideas unfounded claims and bogus information to drill down to the most salient facts By explaining how the human brain works and outing its most irrational processes this book provides the thinking tools that will help you make better decisions ask the right questions at the right time know what to look for when evaluating information and understand how your own brain subconsciously clouds your judgment Think you re too smart to be easily misled Harrison summarizes scientific research showing how easily even intelligent and well educated people can be fooled We all suffer from cognitive biases embellished memories and the tendency to kowtow to authority figures or be duped by dubious truths packaged in appealing stories And as primates we are naturally status seekers so we are prone to irrational beliefs that seem to enhance our sense of belonging and ranking Emotional impulses and stress also all too often lead us into traps of misperception and bad judgment Understanding what science has discovered about the brain makes you better equipped to cope with its built in pitfalls *Good Thinking* the book and the practice makes clear that with knowledge and the right thinking skills anyone can lead a safer wiser more efficient and productive life **Minutes of Evidence Taken Before Her Majesty's Commissioners Appointed to Inquire Into the Subject of Agricultural Depression** Great Britain.
