The Myth of the Community Fix Sarah D. Cate, 2023 A detailed examination of the limitations and pitfalls of pursuing the community based reform movement in the American criminal justice system As the extent of America's mass incarceration crisis has come into sharper view politicians activists and non profit foundations from across the political spectrum have united around community based reforms Many states are pursuing criminal justice reforms that aim to move youth out of state run prisons and into community based alternatives as a way of improving the lives of youth caught in the juvenile justice system In The Myth of the Community Fix Sarah D Cate demonstrates that rather than a panacea community based juvenile justice reforms have resulted in a dangerous constellation of privatized institutions with little oversight Focusing on case studies of three leading states for this model of reform Texas California and Pennsylvania Cate provides a comprehensive look at the alarming on the ground consequences of the turn towards community in an era of austerity Although often portrayed as a break with past practices this book documents how community based reforms are the latest in a long line of policy prescriptions that further individualize the problem of delinquency bolster punitiveness and reduce democratic accountability Through contextualizing the community based reform movement as part of the broader shift away from the centralized provision of public goods in the United States Cate shows why those committed to addressing the problems of mass incarceration should be wary of the community fix

Education and Modernity in

Colonial Punjab Michael Philipp Brunner, 2020-11-23 This book explores the localisation of modernity in late colonial India. As a case study it focuses on the hitherto untold colonial history of Khalsa College Amritsar, a pioneering and highly influential educational institution founded in the British Indian province of Punjab in 1892 by the religious minority community of the Sikhs. Addressing topics such as politics, religion, rural development, militarism, or physical education, the study shows how Sikh educationalists and activists made use of and localised communal, imperial, national, and transnational discourses and knowledge. Their modernist visions and schemes transcended both imperialist and mainstream nationalist frameworks and networks. In its quest to educate the modern Sikh, scientific, practical, disciplined, and physically fit, the college navigated between very local and global claims, opportunities, and contingencies, mirroring modernity's ambivalent simultaneity of universalism and particularism.

The Business of Marketing, Entrepreneurship, and Architecture of Communal Societies in the 1960s and 1970s Rahima Schwenkbeck, 2021-11-13 This book provides an in-depth history of three US-based communal societies that operated in the late 1960s and 1970s: Soul City, Stelle, and Twin Oaks, with an emphasis on their financing, marketing, and entrepreneurship processes. These communities reflect the diversity of people who were dissatisfied with the direction in which American society was heading, often underpinned by concerns over racism, sexism, the environment, and capitalism, and decided to take the radical step of joining a communal society. A moral economy approach offers a lens on how these communities were prevented from fully realizing their visions due to the confines of capitalism, as embedded in banking practices, zoning laws, and systemic racism.

Agrarian Crossings Tore C. Olsson, 2017-08-02 In the 1930s and 1940s, rural reformers in the United States and Mexico waged unprecedented campaigns to remake their countrysides in the name of agrarian justice and agricultural productivity. *Agrarian Crossings* tells the story of how these campaigns were conducted in dialogue with one another, as reformers in each nation came to exchange models, plans, and strategies with their equivalents across the border. Dismantling the artificial boundaries that can divide American and Latin American history, Tore Olsson shows how the agrarian histories of both regions share far more than we realize. He traces the connections between the US South and the plantation zones of Mexico, places that suffered parallel problems of environmental decline, rural poverty, and gross inequities in land tenure. Bringing this tumultuous era vividly to life, he describes how Roosevelt's New Deal drew on Mexican revolutionary agrarianism to shape its program for the rural South. Olsson also looks at how the US South served as the domestic laboratory for the Rockefeller Foundation's green revolution in Mexico, which would become the most important Third World development campaign of the twentieth century, and how the Mexican government attempted to replicate the hydraulic development of the Tennessee Valley Authority after World War II. Rather than a comparative history, *Agrarian Crossings* is an innovative history of comparisons and the ways they affected policy, moved people, and reshaped the landscape.

Building the Population Bomb Emily Klancher Merchant, 2021 Building the Population Bomb carefully examines how the rise of the world s human population came to be understood as problematic by scientists and governments across the globe It challenges our assumption of population growth as inherently problematic by demonstrating how it is our anxieties over population growth and not population growth itself that have detracted from the pursuit of economic environmental and reproductive justice

The Oxford Handbook of Late Colonial Insurgencies and Counter-Insurgencies Martin Thomas, Gareth Curless, 2023-10-10 The lethality of conflicts between insurgent groups and counter insurgent security forces has risen markedly since the Second World War just as those of conventional or inter state wars have declined For several decades conflicts within states rather than between them have been the prevalent form of organised political violence worldwide Recent conflicts in Afghanistan Iraq and Syria have fired interest in colonial experiences of rebellion while current western interventions in sub Saharan Africa have prompted accusations of militarist humanitarianism Yet despite mounting interest in counter insurgency and empire comparative investigation of colonial responses to insurrection and civil disorder is sparse Some scholars have written of a golden age of counter insurgency which began with Britain s declaration of a Malayan Emergency in 1948 and ended with the withdrawal of US ground troops from Vietnam in 1973 It is with this period if not with any presumed golden age that this volume is concerned This Handbook connects ideas about contested decolonization and the insurgencies that inspired it with an analysis of patterns and singularities in the conflicts that precipitated the collapse of overseas empires It attempts a systematic study of the global effects of organized anti colonial violence in Asia and Africa The objective is to reconceptualize late colonial violence in the European overseas empires by exploring its distinctive character and the globalizing processes underpinning it
