twenty years is possible it is that we cannot take anything for granted Steven McDonough opens with examples of language teaching materials and learning a foreign language which teachers and language learners will recognise drawing out questions from these which are addressed throughout the rest of the text Arguments and data from research of all kinds are brought to bear on these and other background issues that are raised for example the nature and effects of classroom discourse the challenges and utility of linguistic theory and linguistic descriptions what knowing a second language means for proficiency and for processing nature and nurture in second language learning how people process language in classrooms and beyond the role of instruction and the roles of teachers and measuring achievement Complex issues are laid out in a clear and accessible style and many examples are used mainly but not exclusively from English and learning English as a second language However the principles apply to learning or teaching any language as a second or foreign language and Applied Linguistics for Language Education is the most concise overview of current linguistics presently available

Translation and Language Education Sara Laviosa, 2014-08-01 The revival of translation as a means of learning and teaching a foreign language and as a skill in its own right is occurring at both undergraduate and postgraduate levels in universities In this book Sara Laviosa proposes a translation based pedagogy that is grounded in theory and has been applied in real educational contexts This volume draws on the convergence between the view of language and translation embraced by ecologically oriented educationalists and the theoretical underpinnings of the holistic approach to translating culture It puts forward a holistic pedagogy that harmonizes the teaching of language and translation in the same learning environment The author examines the changing nature of the role of pedagogic translation starting with the Grammar Translation Method and concluding with the more recent ecological approaches to Foreign Language Education Translation and Language Education analyses current research into the revival of translation in language teaching and is vital reading for translators language teachers and postgraduate students working in the areas of Translation Studies and Applied Linguistics

A History of ELT, Second Edition A.P.R. Howatt, H.G. Widdowson, 2004-06-03 Providing an introduction this work contains sections on the British Empire

On the Subject of English Henry Widdowson, 2019-11-18 The globalized use of language calls into question conventional ways of thinking in linguistics applied linguistics and language pedagogy This book critically examines this thinking from an historical at times satirical perspective and proposes an alternative conceptualization The first section defines a number of key concepts about communication which are taken up in subsequent sections and shown to be relevant to the different but related areas of language study Issues about the relationship between linguistics and applied linguistics set the scene for a discussion of the nature of discourse and then how this bears on the understanding of the globalised use of English as a lingua franca The final section considers the implications of this perspective on communication for how the subject of English language teaching might be redefined The book is relevant for anyone who sees the need for a critical consideration of established concepts in linguistics and language pedagogy

Future Directions in Applied Linguistics Christina Gitsaki, 2011-12-08 The field of applied linguistics covers a diverse range of research and practice and has developed somewhat differently in various parts of the world due to variations in local socio cultural conditions needs and issues However this local diversity does not reflect a field that is incoherent but rather one which has a broad shared international agenda which is invigorated by the diversity brought to the field by local perspectives The papers in this volume represent some of the major global directions that research in applied linguistics is taking and shed light on how language is used to affect practice The aim of this volume is to explore some of the key methods and issues which are guiding applied linguistics into the future through an examination of these issues in local contexts thereby providing a basis for understanding the global directions the field is taking These directions follow two historically defined paths those related to educational studies and language teaching and those related to social issues involving language In the volume half the papers focus on the former examining issues of language teaching language teacher education and second language acquisition

while the other half examine social issues related to language use bilingualism and multilingualism and language policy and planning The collection of papers presented in this book illustrates how these traditional themes are influenced by the rising forces of globalisation and the use of technology thus exemplifying both the new and old ways in which the study of language is realised
