This book takes inventory of and evaluates the available resources for the development of alternative tourism in Turkey. It examines the role of alternative tourism in future tourism development plans and proposes public policies necessary to assure sustainability. Although tourism started later in Turkey than in the Western Mediterranean countries, it has grown very rapidly during the last three decades and today the country ranks among the top ten countries in the world in terms of both arrivals and receipts. However, most of the tourism development has been in the mass tourism sector or the so-called sun, sea, and sand tourism. While crucial for the economic development of Turkey, mass tourism in the absence of proper planning has happened in a haphazard manner, leading to numerous environmental and socio-cultural problems. This book argues that in order to mitigate these problems, Turkey should encourage the development of alternative forms of tourism.

Understanding Innovation in Emerging Economic Spaces Grzegorz Micek, 2016-03-09. A small number of countries, regions, cities, and localities are powerful gatekeepers and generate the bulk of creative and innovative ideas, while the majority is largely excluded. This book looks at neglected but emerging innovation centres analysed from various spatial and organizational perspectives, ranging from entire countries and regions to individual firms and small neighbourhoods. Bringing together leading scholars from various disciplines, it examines a variety of economic sectors including biotechnology, agrotourism, and the food retail industry. The authors employ various, often contradictory concepts ranging from local buzz and the global pipeline through an analysis of collective learning processes to geographical embeddedness, using both qualitative and quantitative approaches. The purpose of the book is twofold: investigating changes occurring in the regions and cities under transformation and attempting to find common and unique mechanisms behind these changes. Consequently, the authors shed light on the scale and scope of the innovativeness of selected economic and social processes.
