WINGS Lesson Plan Guide for Infants Bisa Batten Lewis, 2020-02 WINGS Lesson Plan Guides offer inclusive learning experiences developmentally and culturally appropriate for infants and children up to age 5 for early educators to implement while children are learning in or out of brick and mortar classrooms. Written by a highly qualified, diversely experienced veteran early educator, the WINGS Curriculum Lesson Plan Guide for Infants offers 12 months of complete lesson plans for babies up to age 1, each based on a monthly theme. Each monthly lesson plan includes standards-based activities for individualized developmental play, small groups, large groups, learning centers, outdoor play, story time, music, and movement, computer games, and more. With practical yet progressive lesson plans for the entire calendar year, this book is ideal for every early educator seeking to nurture the abilities of infants in each developmental domain. Activities are coded with WINGS Curriculum Goals/Skills, which are aligned with Common Core Standards for Kindergarten.

Handbook of Prosocial Education Philip M. Brown, Michael W. Corrigan, Ann Higgins-D'Alessandro, 2012-10-12 Handbook of Prosocial Education is the definitive theoretical, practical, and policy guide to the prosocial side of education, the necessary second side of the educational coin. Academic teaching and learning are the first side of education; however, academic success depends upon the structures and support of prosocial educational efforts, from promoting positive school climate to fostering student and teacher development to civic literacy and responsible and critical citizenship participation. The Handbook of Prosocial Education chapters, written by highly respected researchers and outstanding educators, represent the wide range of research-based prosocial interventions from pre-school through high school. The chapters explore and explain how prosocial education helps teachers create effective classroom learning environments to support the development of the whole student. Principals encourage positive school climate, and superintendents work to improve the health and well-being of their systems. As readers will learn, when done well, prosocial education develops the capacities and competencies of students, teachers, and school administrators that lead to a more autonomous, positive self-concept, greater sense of purpose, more socially responsible behaviors, and increased connections between families, schools, and communities. This book pulls together in one place, for the first time, the various threads that create the prosocial education tapestry, making a compelling case for the necessity of changing national educational policy that continues to be ever more oriented to only the academic side of the educational coin, thus jeopardizing the foundational and historic purpose of educating our children for their full human development and participation in our democracy.
