Theory And Evaluation Of Single Molecule Signals:

Theory And Evaluation Of Single-molecule Signals Eli Barkai, Frank L H Brown, Michel Orrit, Haw Yang, 2008-10-24 This book reviews recently developed theoretical and numerical approaches to deal with optical and mechanical signals from individual molecules The character of data generated by single molecules and more generally by single nano objects qualitatively differs from those obtained in conventional experiments on large ensembles of molecules Fluctuations randomness and irreproducibility are central to single molecule measurements and the specific methods required to extract reliable and statistically relevant information from them are presented here With contributions mainly from participants of the Theory Modeling and Evaluation of Single Molecule Measurements workshop held in Leiden the Netherlands on April 16 20 2007 this book is an authoritative compendium on the subject **Theory and Evaluation of Single-molecule Signals**
