Critical International Theory Richard Devetak, 2018-07-04

Whether inspired by the Frankfurt School or Antonio Gramsci the impact of critical theory on the study of international relations has grown considerably since its advent in the early 1980s This book offers the first intellectual history of critical international theory Richard Devetak approaches this history by locating its emergence in the rising prestige of theory and the theoretical persona As theory's prestige rose in the discipline of international relations it

opened the way for normative and metatheoretical reconsiderations of the discipline and the world. The book traces the lines of intellectual inheritance through the Frankfurt School to the Enlightenment German idealism and historical materialism to reveal the construction of a particular kind of intellectual persona: the critical international theorist who has mastered reflexive dialectical forms of social philosophy. In addition to the extensive treatment of critical theory's reception and development in international relations, the book recovers a rival form of theory that originates outside the usual inheritance of critical international theory in Renaissance humanism and the civil Enlightenment. This historical mode of theorising was intended to combat metaphysical encroachments on politics and international relations and to prioritise the mundane demands of civil government over the self-reflective demands of dialectical social philosophies. By proposing contextualist intellectual history as a form of critical theory, Critical International Theory defends a mode of historical critique that refuses the normative temptations to project present conceptions onto an alien past and to abstract from the offices of civil government.

Hobson, 2022-09-30 Globalizing International Theory adds to the literature on non Western international relations IR theory by probing the question of what it means to globalize international theory The book starts with the premise that international theory is unfinished incomplete and homogenous because it provides a limited conception of the international which in turn derives from its partiality that reflects its narrow Western centric bias The contributors argue that the IR vision of the world is projected through a polarizing Western filtered lens Rather than utilizing an objective set of explanatory tools for explaining world politics the reality is that orthodox IR theory only tells us why the West is best and why the Rest should become like the West This means that international theory is not truly international In provincializing Western international theory this volume navigates beyond the Eurocentric and imperial frontier of the prevailing limited conception of the international to explore the hidden contributions to international theory which can be found in the non Western world Bringing in excluded non Western conceptions of international theory highlights a broader conception of the international The book provides a framework for theorizing globally exploring the fundamental problems with Western IR theory and how to overcome them This book will be used by advanced undergraduate and postgraduate students scholars researchers and IR theorists worldwide who are interested in non Western IR theory It will help navigate the problem of internationalness in the face of the grand theoretical problem of our time the use and misuse of international theory in making sense of and responding to the complex global realities of the twenty first century
