it As youth come out at younger ages the process of identity development is necessarily a family process and therapeutic work undertaken to address sexual identity must involve the family Despite this fact as well as decades of research indicating that sexual minority status is a normal variation on a continuum of sexual identities the field of family therapy has not contributed a family model that nurtures queerness Stone Fish and Harvey recognize this disjunction between available therapeutic models and the actual needs of clients Drawing on data from developmental research the concepts of queer theory as well as their own extensive clinical experience as family therapists the authors develop an effective model of family therapy that nurtures queer youth and their families The key processes of the model are creating refuge fostering difficult dialogues nurturing queerness and encouraging transformation Each therapeutic process is addressed in a single chapter which articulates the basic concept of the process presents the research supporting the importance of the process and then shows how to put the process into action in the therapeutic context In the course of developing and illustrating these four key processes for helping queer youth and their families Stone Fish and Harvey introduce readers to five families whose experiences of learning to nurture their queer youth are basic to the therapeutic lessons presented here The approach is above all one that is sensitive to the specific dynamics of individual families and respectful of the challenges that all family members must face and overcome in the course of nurturing each individual s gifts as well as the gifts of the family unit The families whose stories readers will follow from chapter to chapter are as much teachers as they are students in the collaborative family therapy presented with such vividness and narrative force by the authors Nurturing Queer Youth is a book for all family therapists and mental health professionals This transformative approach to family therapy will enhance clinical work with all families because the model challenges cultural and familial assumptions that are harmful to all intimate relationships Today every therapist needs to be familiar with how sexual identity issues present in the family context and how to work with queer youth and their families toward a family dynamic that is positive and nurturing of queerness Therapists who specialize in treating sexual minority youth will also profit from having an effective guide to conducting family therapy including a relational map to family dynamics and ideas for intervention **Nurturing Queer Youth** Linda Stone Fish,2005
