Traces Remain Essays And Explorations:

Traces Remain Charles Nicholl, 2011-12-01 In these wonderfully stylish and eclectic essays Charles Nicholl pursues the fugitive traces of the past with the skill and relish that have earned him a reputation as one of the finest literary and historical detectives of our time His subjects range from a murder case in Renaissance Rome to the disappearance of Jim Thompson in 1960s Malaya from the boyhood of Christopher Marlowe to the crimes of Jack the Ripper from the remnants of a lost Shakespeare play to the last days of the poet boxer Arthur Cravan in a Mexican fishing port Full of insights curiosities and unexpected discoveries these thirty pieces written over two decades show the author of *The Lodger* and *Leonardo da Vinci at his inquisitive best* *Free Will* Richard Wilson, 2016-05-16 Free Will Art and power on Shakespeare's stage is a study of theatre and sovereignty that situates Shakespeare's plays in the contraflow between two absolutisms of early modern England the aesthetic and the political Starting from the dramatist's cringing relations with his princely patrons Richard Wilson considers the ways in which this bending author identifies freedom in failure and power in weakness by staging the endgames of a sovereignty that begs to be set free from itself The arc of Shakespeare's career becomes in this comprehensive new interpretation a sustained resistance to both the institutions of sacred kingship and literary autonomy that were emerging in his time In a sequence of close material readings *Free Will* shows how the plays instead turn command performances into celebrations of an art without sovereignty which might give delight but hurt not and leave not a rack behind *Free Will* is a profound rereading of Shakespeare art and power that will contribute to thinking not only about the plays but also about aesthetics modernity sovereignty and violence *Learning With Leonardo: Unfinished Perfection: Making children cleverer: what does Da Vinci tell us?* Ian Warwick, Ray Speakman, 2019-03-11 What are the seven key concepts that drove Da Vinci's inventive thinking and how can we still use them to improve our own creativity 500 years after his death In pursuit of the unified learning principles that sit at the heart of his work Ian Warwick and Ray Speakman brilliantly explore the approaches that we need to take to make our own learning more original and thoughtful **Voices in the History of Madness** Robert Ellis, Sarah Kendal, Steven J. Taylor, 2021-05-12 This book presents new perspectives on the multiplicity of voices in the histories of mental ill health In the thirty years since Roy Porter called on historians to lower their gaze so that they might better understand patient doctor roles in the past historians have sought to place the voices of previously silent marginalised and disenfranchised individuals at the heart of their analyses Today the development of service user groups and patient consultations have become an important feature of the debates and planning related to current approaches to prevention care and treatment This edited collection of interdisciplinary chapters offers new and innovative perspectives on mental health and illness in the past and covers a breadth of opinions views and interpretations from patients practitioners policy makers family members and wider communities Its chronology runs from the early modern period to the twenty first century and includes international and transnational analyses from Europe North America Asia and Africa

Time Reborn Lee Smolin, 2013-04-23 In *Time Reborn* Lee Smolin one of our foremost physicists and thinkers offers a radical new view of the nature of time and the cosmos Nothing seems more real than time passing We experience life itself as a succession of moments Yet throughout history the idea that time is an illusion has been a religious and philosophical commonplace We identify certain truths as eternal constants from moral principles to the laws of mathematics and nature these are laws that exist not inside time but outside it From Newton and Einstein to today's string theorists and quantum physicists the widest consensus is that the universe is governed by absolute timeless laws In *Time Reborn* Lee Smolin argues that this denial of time is holding back both physics and our understanding of the universe We need a major revolution in scientific thought one that embraces the reality of time and places it at the centre of our thinking $E=mc^2$ may equal mc^2 now but that wasn't always the case Similarly as our understanding of the universe develops Newton's fundamental laws might not remain so fundamental Time Smolin concludes is not an illusion it is the best clue we have to fundamental reality *Time Reborn* explains how the true nature of time impacts on us our world and our universe The strongest dose of clarity in written form to have come along in decades The implications go far beyond physics to economics politics and personal philosophy *Time Reborn* places reality above theory in stronger and clearer terms than ever before and the result is a path to better theory and potentially to a better society as well Will no doubt be remembered as one of the essential books of the 21st century Jaron Lanier Praise for Lee Smolin's *The Trouble With Physics* The best book about contemporary science written for the layman that I have ever read Read this book Twice Sunday Times Unusually broad and deep his critical judgments are exceptionally penetrating Roger Penrose Brave uniquely well informed does a tremendous job Mail on Sunday Lee Smolin is a theoretical physicist who has made important contributions to the search for quantum gravity Born in New York City he was educated at Hampshire College and Harvard University Since 2001 he is a founding faculty member at Perimeter Institute for Theoretical Physics His three earlier books explore philosophical issues raised by contemporary physics and cosmology They are *Life of the Cosmos* 1997 *Three Roads to Quantum Gravity* 2001 and *The Trouble with Physics* 2006 He lives in Toronto

The Theoretical Minimum Leonard Susskind, George Hrabovsky, 2013-01-29 For anyone who is determined to learn physics for real looking beyond conventional popularizations this is the ideal place to start It gets directly to the important points with nuggets of deep insight scattered along the way Sean Carroll physicist and author of *The Particle at the End of the Universe* In this stimulating primer world class physicist and father of string theory Leonard Susskind and citizen scientist George Hrabovsky combine forces to provide the ultimate master class in modern physics Unlike most popular physics books which give readers a taste of what physicists know but not what they actually do Susskind and Hrabovsky teach the skills you need to do physics yourself Combining crystal clear explanations of the laws of the

universe with basic exercises the authors cover the minimum the theoretical minimum of the title that readers need to master in order to move on to more advanced topics In a lucid engaging style Susskind and Hrabovsky introduce the key concepts of modern physics from classical mechanics to general relativity to quantum theory Instead of shying away from the equations and maths that are essential to any understanding of physics they provide a practical toolkit that you won't find in any other popular science book The Theoretical Minimum is a book for anyone who has ever regretted not taking physics at university who knows a little but is keen to know more or who simply wants to learn how to think like a physicist Loss and the Literary Culture of Shakespeare's Time Roslyn L. Knutson, David McInnis, Matthew Steggle, 2020-03-26 As early modernists with an interest in the literary culture of Shakespeare's time we work in a field that contains many significant losses of texts of contextual information of other forms of cultural activity No account of early modern literary culture is complete without acknowledgment of these lacunae and although lost drama has become a topic of increasing interest in Shakespeare studies it is important to recognize that loss is not restricted to play texts alone Loss and the Literary Culture of Shakespeare's Time broadens the scope of the scholarly conversation about loss beyond drama and beyond London It aims to develop further models and techniques for thinking about lost plays but also of other kinds of lost early modern works and even lost persons associated with literary and theatrical circles Chapters examine textual corruption oral preservation quantitative analysis translation and experiments in verbatim theater plus much more **Great British Eccentrics** S. D. Tucker, 2015-09-15 An entertaining guide to the most eccentric characters from British history Cooked Michael Pollan, 2013-04-23 THE INSPIRATION FOR THE NEW NETFLIX SERIES It's not often that a life changing book falls into one's lap Yet Michael Pollan's Cooked is one of them Sunday Telegraph This is a love song to old slow kitchen skills at their delicious best Kathryn Hughes GUARDIAN BOOKS OF THE YEAR The New York Times Top Five Bestseller Michael Pollan's uniquely enjoyable quest to understand the transformative magic of cooking Michael Pollan's Cooked takes us back to basics and first principles cooking with fire with water with air and with earth Meeting cooks from all over the world who share their wisdom and stories Pollan shows how cooking is at the heart of our culture and that when it gets down to it it also fundamentally shapes our lives Filled with fascinating facts and curious mouthwatering tales from cast of eccentrics Cooked explores the deepest mysteries of how and why we cook **The Silence of Animals** John Gray, 2013-02-28 The powerful beautiful and chilling sequel to the bestselling Straw Dogs John Gray draws on an extraordinary array of memoirs poems fiction and philosophy to make us re-imagine our place in the world Writers as varied as Ballard Borges Freud and Conrad are mesmerised by forms of human extremity experiences on the outer edge of the possible or which tip into fantasy and myth What happens to us when we starve when we fight when we are imprisoned And how do our imaginations leap into worlds way beyond our real experience The Silence of Animals is consistently fascinating filled with unforgettable images and a delight in the conundrum of our existence an existence which we decorate with countless myths and ideas where we twist

and turn to avoid acknowledging that we too are animals separated from the others perhaps only by our self conceit In the Babel we have created for ourselves it is the silence of animals that both reproaches and bewitches us

Reviews The Silence of Animals is a new kind of book from Gray a sort of poetic reverie on the human state on the state that is of the human animal He blends lyricism with wisdom humour with admonition nay saying with affirmation making in the process a marvellous statement of what it is to be both an animal and a human in the strange terrifying and exquisite world into which we straw dogs find ourselves thrown John Banville Guardian Interesting original and memorable The Silence of Animals is a beautifully written book the product of a strongly questioning mind It is effectively an anthology with detailed commentary setting out one rich and suggestive episode after another Philip Hensher Spectator About the author John Gray has been Professor of Politics at Oxford University Visiting Professor at Harvard and Yale and Professor of European Thought at the London School of Economics He now writes full time His books include False Dawn The Delusions of Global Capitalism Straw Dogs Thoughts on Humans and Other Animals and The Immortalization Commission The Strange Quest to Cheat Death His selected writings Gray s Anatomy was published in 2009 *Colonising Te Whanganui ā Tara and Marketing Wellington, 1840-1849* Patricia Thomas,2019-11-08 This book examines the advertising posters town plans and geographical views that encouraged middle class emigration to New Zealand in the 1840s It explores how the New Zealand Company exploited visual literacy to advertise its settlement in Te Whanganui Tara Wellington A tale of two towns prospective English settlers looked to Wellington to make their homes while Te Whanganui Tara was already home to numerous M ori sub tribes The book explores the worlds of each to ask how the images produced by the New Zealand Company were complicit in transferring M ori land into English ownership Not seeking blame it works instead to understand and investigates processes of redress offering hope for a post post colonial future in Aotearoa New Zealand This book will interest scholars and students of migration visual culture and print history

The Gold Machine Iain Sinclair,2021-09-02 A New Statesman Book of the Year 2021 Follow Iain Sinclair into the cloud jungles of Peru and emerge questioning all that seemed so solid and immutable Barry Miles From the award winning author of The Last London and Lights Out for the Territory a journey in the footsteps of our ancestors Iain Sinclair and his daughter travel through Peru guided by and in reaction to an ill fated colonial expedition led by his great grandfather The family history of a displaced Scottish highlander fades into the brutal reality of a major land grab The historic thirst for gold and the establishment of sprawling coffee plantations leave terrible wounds on virgin territory In Sinclair s haunting prose no place escapes its past and nor can we The Gold Machine is a trip a psychoactive expedition in compelling company TLS

The fictions of Arthur Cravan Dafydd Jones,2019-02-18 The first comprehensive English language account and critical reading of the legendary poet and boxer Arthur Cravan a fleeting figure on the periphery of early twentieth century European avant gardism "O Lord, Thy Word is Settled in Heaven": A Celebration of the History of Mount Pleasant Road Baptist Church, 1920-2013 , **Beautiful Untrue Things** Gregory Mackie,2019-05-09 Borrowing its

title from Oscar Wilde's essay *The Decay of Lying* this study engages questions of fraudulent authorship in the literary afterlife of Oscar Wilde The unique cultural moment of Wilde's early twentieth century afterlife Gregory Mackie argues afforded a space for marginal and transgressive forms of literary production that ironically enough Wilde himself would have endorsed *Beautiful Untrue Things* recovers the careers of several forgers who successfully inhabited the persona of the Victorian era's most infamous homosexual and arguably its most successful dramatist More broadly this study tells a larger story about Oscar Wilde's continued cultural impact at a moment when he had fallen out of favour with the literary establishment It probes the activities of a series of eccentric and often outrageous figures who inhabited Oscar Wilde's much mythologized authorial persona in forging him they effectively wrote as Wilde in order to argue that literary forgery can be reimagined as a form of performance But to forge Wilde and generate beautiful untrue things in his name is not only an exercise in role playing it is also crucially a form of imaginative world making resembling what we describe today as fan fiction

Accidental Gods Anna Della Subin, 2021-12-07 NAMED A BEST BOOK OF THE YEAR BY *ESQUIRE* *THE IRISH TIMES* AND *THE TIMES LITERARY SUPPLEMENT* SHORTLISTED FOR THE PEN HESSELL TILTMAN PRIZE A provocative history of men who were worshipped as gods that illuminates the connection between power and religion and the role of divinity in a secular age Ever since 1492 when Christopher Columbus made landfall in the New World and was hailed as a heavenly being the accidental god has haunted the modern age From Haile Selassie acclaimed as the Living God in Jamaica to Britain's Prince Philip who became the unlikely center of a new religion on a South Pacific island men made divine always men have appeared on every continent And because these deifications always emerge at moments of turbulence civil wars imperial conquest revolutions they have much to teach us In a revelatory history spanning five centuries a cast of surprising deities helps to shed light on the thorny questions of how our modern concept of religion was invented why religion and politics are perpetually entangled in our supposedly secular age and how the power to call someone divine has been used and abused by both oppressors and the oppressed From nationalist uprisings in India to Nigerian spirit possession cults Anna Della Subin explores how deification has been a means of defiance for colonized peoples Conversely we see how Columbus Cortés and other white explorers amplified stories of their godhood to justify their dominion over native peoples setting into motion the currents of racism and exclusion that have plagued the New World ever since they touched its shores At once deeply learned and delightfully antic *Accidental Gods* offers an unusual keyhole through which to observe the creation of our modern world It is that rare thing a lyrical entertaining work of ideas one that marks the debut of a remarkable literary career
