South Daniel Schaffer, 2015-09-29 Science in the developing world has experienced historic change over the past 30 years. Nations that lacked resources for even basic science have since developed world class research centres. Men and women who previously had no chance of pursuing scientific careers in their own countries now thrive in home grown universities and laboratories dedicated to scientific excellence. The World Academy of Sciences (TWAS) has been front and centre during this remarkable transformation. *A Voice for Science in the South* tells the story of TWAS through the eyes of 11 eminent scientists associated with the Academy. They speak of the organization's challenges and triumphs and describe what TWAS has meant for their careers and the careers of thousands of scientists in the developing world. They also explore the challenges that lie ahead for TWAS and more generally for science in the South. It is a story of unprecedented global change and an account of what must be done to ensure that all nations can share in the benefits that emerge when science is woven into the fabric of society.

Dry Ehsan Masood, Daniel Schaffer, 2006 Water is in the air we breathe and beneath the ground we walk on. The very substance of life it makes up as much as 60 percent of the human body. And yet for one billion people there is such a thing as life without water. These are the people we meet in *Dry*: those who live in the dry lands of Africa, Asia, the Pacific and the Americas, eking out an existence at once remarkable and mundane between craggy mountains, near oases or close to well springs surrounded by cracked earth or shifting sands. From the ingenuity of the highland people of Chile's Atacama desert who use giant nets to capture water from clouds of fog to the ancient wisdom that protects the grazing lands of Kenya's Masai, this beautifully illustrated book tells the diverse stories about people in very hot, very cold or very high places who spend their lives collecting, chasing, piping and trapping the water that life requires, all the while taking great care that no form of life, plant or animal, benefits at the expense of another. In a world of finite resources where the struggle for shrinking sources of water intensifies daily, these stories collected over three years by photographers, writers and scientists from four continents are a source of hope and wonder. This book contains a wealth of information and images designed to further awareness of the vast array of life that is carried on precariously yet proudly on the earth's driest lands.

*Insider's Guide to Book Editors, Publishers, and Literary Agents, 1996-1997* Jeff Herman, 1995-10-25 No other book gives aspiring authors the inside scoop on the names and specialties of acquisitions editors. This vital information makes all the difference when submitting a book proposal or manuscript by keeping writers of all genres on top of the rapidly changing world of publishing. Who's moved where, who's new to the scene, who's gone for good, it's all here in one big volume.

Gaining Voice Christopher J. Clark, 2019-02-25 This book examines the causes and consequences of black representation in state legislatures. African Americans have a troubled history when it comes to wielding political power. This reality makes it important to consider the factors that increase their presence in state government. This book shows that there is more to explaining black representation than the presence of black people; instead, institutional traits also affect the racial composition of legislatures. Surprisingly, Clark finds that black political involvement and political attitudes hinge on the

proportion of African Americans making up a state legislature as well as the degree to which that proportion reflects the demographic makeup of the state

**The Black Urban Community** G. Tate, 2019-06-12 This book explores the many facets of black urban life from its genesis in the 18th century to the present time With some historical background the volume is primarily a contemporary critique focusing on the major themes which have arisen and the challenges the confront African Americans as they create communities political economy religion and spirituality health care education protest and popular culture The essays all examine the interplay between culture and politics and the ways in which forms of cultural expression and political participation have changed over the past century to serve the needs of the black urban community The collection closes with analysis of current struggles these communities face joblessness political discontent frustrations with health care and urban schools and the ways in which communities are responding to these challenges

***Voices of Modernity*** Richard Bauman, Charles L. Briggs, 2003-07-03 Language and tradition have long been relegated to the sidelines as scholars have considered the role of politics science technology and economics in the making of the modern world This reading of over two centuries of philosophy political theory anthropology folklore and history argues that new ways of imagining language and representing supposedly premodern people the poor labourers country folk non europeans and women made political and scientific revolutions possible The connections between language ideologies privileged linguistic codes and political concepts and practices shape the diverse ways we perceive ourselves and others This 2003 book demonstrates that contemporary efforts to make schemes of social inequality based on race gender class and nationality seem compelling and legitimate rely on deeply rooted ideas about language and tradition Showing how critics of modernity unwittingly reproduce these foundational fictions it suggests strategies for challenging the undemocratic influence of these voices of modernity

**Voices of Civil Rights Lawyers** Kent Spriggs, 2017-06-06 Civil rights lawyers were handmaidens of change who worked in the back rooms during twentieth century America s era of profound social upheaval Kent Spriggs a noted lawyer of the period gathers stories of legal maneuvers and memories of racial injustices from 26 voices white and black male and female Northern born and Southern born many of whom share their own defining moments as civil rights lawyers This collective perspective adds depth to the history of the era and its window on the legal and extralegal activities that occurred away from the actual protest venues The framing materials place civil rights litigation into the context of major events from the 1960s and the concluding section reflects on contemporary relevancies and continuing legacies

**Directory of U.S. Fulbright Scholars**, 2000 [Wyrd Ecology](#) Barbara Jane Davy, 2025-05-06 Within contemporary Heathen communities the Old English term *wyrd* is used to refer to the web of relations that connect all threads of existence Inspired by pre Christian traditions of Northern Europe Heathens give gifts toasts and offerings to foster a sense of connection with other humans and the more than human world In *Wyrd Ecology* author Barbara Jane Davy posits that these ritual activities are not merely isolated exchanges but rather a means of sustaining entire relational systems in turn inspiring

givers and receivers to participate out of a desire for meaningful connection Davy utilizes research from two years of participant observation in a Heathen community in Ontario Canada to show how ritual activities deepen practitioners sense of appreciation for what they have already received and instil a desire to give back Davy illustrates how making offerings and giving gifts is important not only because of what people might believe about the gods but because it gives people a sense of relatedness with their world Ritual practices may thus play a critical role in instilling an ecological conscience and can encourage ethical relations and pro environmental behavior
