Trade Unions In Asia An Economic And Sociological Analysis:

Trade Unions in Asia John Benson, Ying Zhu, 2008-05-30 Offering a comprehensive account of the role of trade unions in Asia today this book put together by two editors who have published extensively in the areas of business and economics in Asia covers all the important Asian economies both developed and developing Making a vital contribution to the very small amount of literature that has been pub *Trade Unions and Labour Movements in the Asia-Pacific Region* Byoung-Hoon Lee, Ng Sek-Hong, Russell Lansbury, 2019-09-16 Recent developments in the world economy including deindustrialisation and the digital revolution have led to an increasingly individualistic relationship between workers and employers which in turn has weakened labour movements and worker representation However this process is not universal including in some countries of Asia where trade unions are closely aligned with the interests of the dominant political party and the state This book considers the many challenges facing trade unions and worker representation in a wide range of Asian countries For each country full background is given on how trade unions and other forms of worker representation have arisen Key questions then considered include the challenges facing trade unions and worker representation in each country the extent to which these are a result of global or local developments and the actions being taken by trade unions and worker representative bodies to cope with the challenges This book is dedicated to the memory of Professor Keith Thurley London School of Economics *Trade Liberalisation and Poverty in South Asia* Prema-chandra Athukorala, Jayatilleke S. Bandara, Saman Kelegama, 2012-05-23 The link between trade liberalisation and poverty has arguably been one of the most debated topics in development policy debate Existing studies on the subject have primarily used multi country cross sectional data and there is a growing concern about the limitations of this approach in providing a sound empirical basis for informing the policy debate These limitations point to the need for undertaking in depth analyses within individual countries over time In order to examine the connection between trade liberalisation and poverty this book provides case studies of trade policy reforms and poverty reduction outcomes of seven countries in South Asia Bangladesh Bhutan India Maldives Nepal Pakistan and Sri Lanka The South Asia region allows for an excellent comparative study given the widespread emphasis on liberalisation reforms in the region over the past two decades as well as highlighting significant inter country differences in terms of the timing and comprehensiveness of reforms and the heavy concentration of world poverty in the region This book is a useful contribution to studies on South Asia as well as International Trade and Development Economics

The book concludes with a discussion of how Japanese approach to marketing is likely to develop at a time when globalisation and international marketing are having an increasing impact in Japan.

Women, Labour and the Economy in India Deepita Chakravarty, Ishita Chakravarty, 2015-10-30 The last available census estimated around 10 per cent of total urban working women in India are concentrated in the low paid domestic services such as cleaning cooking and taking care of the children and the elderly. This is found to be much higher in certain parts of India emerging as the single most important avenue for urban females surpassing males in the service since the 1980s. By applying an imaginative and refreshing mix of disciplinary approaches ranging from economic models of the household empirical analysis and literary conventions this book analyses the changing labour economy in post partition West Bengal. It explains how and why women and girl children have replaced this traditionally male bias in the gender segregated domestic service industry since the late 1940s and addresses the question of whether this increase in vulnerable individuals working in domestic service the growth of the urban professional middle class in the post liberalization period and the increasing incidences of reported abuses of domestics in urban middleclass homes in the recent years are related. Covering five decades of the history of gender and labour in India this book will be of interest to scholars working in the fields of gender and labour relations development studies economics history and women and gender studies.

Reform and Productivity Growth in India Dibyendu Maiti, 2014-01-03 During the last two decades India has experienced a high growth rate but the contribution from productivity growth and technological progress has been very low. This has resulted in a poor performance in the employment generation in the formal sector and this book examines this phenomenon and the Indian growth pattern. Using primary and secondary data the book looks at the impact of economic reform on technological change and total productivity growth and in turn its impact on the labour market. It examines the effect of trade reform on the form and functioning of labour markets and goes on to look at the impact of the global financial crisis on the Indian labour market. Offering interesting modelling exercises and empirical verifications that bring fresh ideas and new content this book is of interest to academics in the fields of development economics international economics and South Asian studies.

Labour and Development in East Asia Kevin Gray, 2014-10-10 The Chinese Communist Party s response to the wave of factory strikes in the early summer of 2010 has raised important questions about the role that labour plays in the transformation of world orders In contrast to previous policies of repression towards labour unrest these recent disputes centring round wages and working conditions have been met with a more permissive response on the part of the state as the CCP ostensibly seeks to facilitate a transition away from a model of political economy based on low road labour relations and export dependence Labour and Development in East Asia shows that such inter linkages between labour geopolitical transformations and states

developmental strategies have been much more central to East Asia's development than has commonly been recognised. By adopting an explanatory framework of the labour geopolitics development nexus, the book theorises and provides an historical analysis of the formation and transformation of the East Asian regional political economy from the end of the Second World War to the present, with particular reference to Japan, South Korea, Taiwan, and China. This book will be required reading for students and scholars of international relations, development studies, and comparative politics.

The Oxford Handbook of Asian Business Systems Michael A. Witt, Gordon Redding, 2014-01-30. Much of the existing literature within the varieties of capitalism (VOC) and comparative business systems fields of research is heavily focused on Europe, Japan, and the Anglo-Saxon nations. As a result, the field has yet to produce a detailed empirical picture of the institutional structures of most Asian nations and to explore to what extent existing theory applies to the Asian context. *The Oxford Handbook of Asian Business Systems* aims to address this imbalance by exploring the shape and consequences of institutional variations across the political economies of different societies within Asia. Drawing on the deep knowledge of 32 leading experts, this book presents an empirical comparative institutional analysis of 13 major Asian business systems between India and Japan. To aid comparison, each country chapter follows the same consistent outline. Complementing the country chapters are eleven contributions examining major themes across the region in comparative perspective and linking the empirical picture to existing theory on these themes. A further three chapters provide perspectives on the influence of history and institutional change. The concluding chapters spell out the implications of all these chapters for scholars in the field and for business practitioners in Asia. The Handbook is a major reference work for scholars researching the causes of success and failure in international business in Asia.

Work-Life Research in the Asia-Pacific Xi Wen Chan, Sudong Shang, Luo Lu, 2024-03-29. This book addresses the most pressing and current work-life issues that are impacting Equity, Diversity, and Inclusion (EDI) in organisations across the Asia-Pacific. It is organised around three major themes: 1. Work-life equality and justice; 2. Technology, work, and family; and 3. Work-life values and trends in Asia, all of which will be discussed in relation to EDI. Issues concerning the work-life interface are closely intertwined with issues relating to EDI; for example, labour market inequalities are often fuelled by the interplay of gender, race, and family circumstances. Yet comparatively lesser attention has been given to the non-work aspects, particularly the family context, in research on the work-life interface and contemporary EDI issues. Breaking away from a predominantly Western perspective, this volume offers fresh insights and empirical evidence, shedding light on the most urgent and critical work-life challenges faced by people in the Asia-Pacific. It also provides deep understanding of the broader social, economic, and political

environments shaping work life trends It will appeal to researchers and practitioners interested in topics related to human functioning and flourishing at work at home and in society
