traditions such as Hinduism or Buddhism have been brought into growing numbers of public schools since the 1970s. While they are commonly assumed to be secular educational tools, Candy Gunther Brown asks whether religion is truly left out of the equation in the context of public school curricula. An expert witness in four legal challenges, Brown scrutinized unpublished trial records, informant interviews, and legal precedents as well as insider documents, some revealing promoters of Vedic victory or stealth Buddhism for public school children. The legal challenges are fruitful cases for Brown's analysis of the concepts of religious and secular. While notions of what makes something religious or secular are crucial to those who study religion, they have special significance in the realm of public and legal norms. They affect how people experience their lives, raise their children, and navigate educational systems. The question of religion in public education, Brown shows, is no longer a matter of jurisprudence focused largely on the establishment of a Protestant Bible or nonsectarian prayer. Instead, it now reflects an increasingly diverse American religious landscape. Reconceptualizing secularization as transparency and religious voluntarism, Brown argues for an opt-in model for public school programs.

Rhythms of Learning Rudolf Steiner, 1998. Key lectures on children and education have been thoughtfully chosen from the vast amount of material by Steiner and presented in a context that makes them approachable and accessible. In his many discussions and lectures, Steiner shared his vision of an education that considers the spirit, soul, and physiology in children as they grow.

The Roots of Education Rudolf Steiner, 1998-02. In an age focused increasingly upon a cultural, political, and social understanding of otherness as diversity, preferring to ponder God, if at all, mostly in terms of immanence, depth psychology is in danger of becoming breadth psychology. The search for transcendence has become more and more the province of New Age weekend workshops. On the other hand, depth psychology that seeks only the transpersonal without the incarnate spirit in the flesh of everyday relationships in history may likewise prove to be a failed enterprise. In this work, I compare and contrast Boehme's and Jung's experiences with a special focus on the religious or psychological experience of what Erich Neumann calls unitary reality: a ground of being that contains all opposites in potentiality. From the book *Dark Light of the Soul*, explores the inner journeys of Jacob Boehme, the seventeenth-century Protestant mystic, and C. G. Jung, the twentieth-century depth psychologist. Each was concerned with the immediacy of experience yet comprehended the importance of spirit as a transforming presence in human life. Kathryn Wood Madden connects the experiences of these two pioneers, focusing on a ground of being that contains all opposites in potentiality. She

examines those experiences from the perspective of depth psychology and religion offering meaningful insights for anyone on a path of inner development as well as for professionals in clinical settings Dark Light of the Soul will be of interest to all therapeutic clinicians and anyone who wishes a deeper understanding of and fresh paths into the human psyche Because so much tension exists in the world in the way each of us apprehends the divine we sorely need a way of working with our psyches this is imperative in fact to human existence and survival in the face of terrorism fundamentalism and archetypal evil We need to locate and work within a psycho spiritual umbrella that is large enough to house contradictions from the book
