The Story Of Pain From Prayer To Painkillers:

The Story of Pain Joanna Bourke, 2014 The story of pain and suffering since the eighteenth century Prize winning historian Joanna Bourke charts how our understanding of pain and how to cope with it has changed completely over the last three centuries *Edinburgh Companion to the Critical Medical Humanities* Whitehead Anne Whitehead, 2016-06-14 Original critical engagements at the intersection of the biomedical sciences arts humanities and social sciences In this landmark Companion expert contributors from around the world map out the field of the critical medical humanities This is the first volume to comprehensively introduce the ways in which interdisciplinary thinking across the humanities and social sciences might contribute to critique and develop medical understanding of the human individually and collectively The thirty six newly commissioned chapters range widely within and across disciplinary fields always alert to the intersections between medicine as broadly defined and critical thinking Each chapter offers suggestions for further reading on the issues raised and each section concludes with an Afterword written by a leading critic outlining future possibilities for cutting edge work in this area Key Features Offers an introduction to the second wave of the field of the medical humanities Positions the humanities not as additive to medicine but as making a decisive intervention into how health medicine and clinical care might think about individual subjective and embodied experience Exemplifies the commitment of the critical medical humanities to genuinely interdisciplinary thinking by stimulating multi disciplinary dialogue around key areas of debate within the field Presents thirty six original chapters from leading and emergent scholars in the field who are defining its new critical edge *Sickness, medical welfare and the English poor, 1750-1834* Steven King, 2018-05-30 At the core of this book are three central contentions That medical welfare became the totemic function of the Old Poor Law in its last few decades that the poor themselves were able to negotiate this medical welfare rather than simply being subject to it and that being doctored and institutionalised became part of the norm for the sick poor by the 1820s in a way that had not been the case in the 1750s Exploring the lives and medical experiences of the poor largely in their own words *Sickness medical welfare and the English poor* offers a comprehensive reinterpretation of the so called crisis of the Old Poor Law from the later eighteenth century The sick poor became an insistent presence in the lives of officials and parishes and the largely positive way that communities responded to their dire needs must cause us to rethink the role and character of the poor law Women, Religion, and Emotions in Modern Germany and Beyond Lisa Fetheringill Zwicker, Martina Cucchiara, 2025 Analyzes the role of emotions in the religious lives of women from across Germany and Europe from the nineteenth century to the 1970s Scholarship on women and religion has focused primarily on the intersection between women s religious engagement and their emancipation This volume goes beyond that to examine the vital role religion has played in the private and public lives of German and European women Because emotions are central to the expression of religiosity it draws on approaches from the history of emotions to examine how women understood felt and practiced religion in their search for meaning Spanning

from the nineteenth century to the 1970s the volume's essays show how religion helped women make sense of their lives. It also illuminates the degree to which women used religion and its attendant emotional scripts to shape modern society and how religious discourses in turn shaped women's emotions and comportment in the public sphere. The volume builds on recent research that shows that religion especially the religiosity of women remained a pressing public concern in modern Europe. From anxieties over the religiosity of Bavarian servants to restrictive norms imposed on Jewish widows from the interfaith commitments of kindergarten teachers to the autobiographical narratives of aspiring Protestant deaconesses from the suffering of stigmatics in Germany and Belgium to Irish women's public narratives of their religiosity this book reveals how women's faith and attendant religious emotions have been central to their public and private lives.

oceans to reveal a language of suffering understood and shared across diverse early American communities
