Transitions from Authoritarian Rule Guillermo O'Donnell,Philippe C. Schmitter,Laurence Whitehead,1986-10 An array of internationally noted scholars examines the process of democratization in Southern Europe and Latin America The authors provide new interpretations of both current and historical efforts of nations to end periods of authoritarian rule and to initiate transition to democracy efforts that have met with widely varying degrees of success and failure Extensive case studies of individual countries a comparative overview and a synthesis conclusions offer important insights for political scientists students and all concerned with the prospects for democracy In Volume 3 despite the unique contexts of transitions in individual countries significant points of comparison emerge such as the influence of foreign nations and the role of agents outside the government These analyses explore both intra and interregional similarities and differences *Transitions from Authoritarian Rule* Guillermo A. O'Donnell,1986-09 An array of internationally noted scholars examines the process of democratization in southern Europe and Latin America They provide new interpretations of both current and historical efforts of nations to end periods of authoritarian rule and to initiate transition to democracy efforts that have met with widely varying degrees of success and failure Extensive case studies of individual countries a comparative overview and a synthesis conclusions offer important insights for political scientists students and all concerned with the prospects for democracy The historical example of Italy after Mussolini as well as the more recent cases of Greece Portugal Spain and Turkey suggest factors that may make a transition relatively secure **Transitions from Authoritarian Rule** Guillermo A. O'Donnell,Philippe C. Schmitter,Laurence Whitehead,1986 *Transitions from Authoritarian Rule* Guillermo O'Donnell,Philippe C. Schmitter,Laurence Whitehead,1986-10 An array of internationally noted scholars examines the process of democratization in Southern Europe and Latin America The authors provide new interpretations of both current and historical efforts of nations to end periods of authoritarian rule and to initiate transition to democracy efforts that have met with widely varying degrees of success and failure Extensive case studies of individual countries a comparative overview and a synthesis conclusions offer important insights for political scientists students and all concerned with the prospects for democracy In Volume 3 despite the unique contexts of transitions in individual countries significant points of comparison emerge such as the influence of foreign nations and the role of agents outside the government These analyses explore both intra and interregional similarities and differences *Elites and Democratic Transitions by Regime Transformation in Southern Europe* Ioannis Tzortzis,2022-09-16 This book examines three cases of democratic transitions by self transformation of the non democratic regimes in Southern Europe the Spanish reforma pactada ruptura pactada of 1976 77 the Greek Markezinis experiment of 1973 and the Turkish democratic transition of 1983 in a comparative perspective The author argues that a democratic transition initiated by the regime elites is in contrast to widely held assumptions and notwithstanding some reservations on whether democracy can be re introduced by non democrats worth viewing as a

window of opportunity for democratisation It is up to the democratic counter elites to respond to it using the civil society and the international factor as allies to achieve their goal of acquiring more concessions from the regime

The Political Economy of Democratic Transitions Stephan Haggard, Robert R. Kaufman, 2018-06-05 In the last two decades there has been a widespread movement from authoritarian to democratic rule among developing countries often occurring against a backdrop of severe economic crises and the adoption of market oriented reforms The coincidence of these events raises long standing questions about the relationship between economic and political change In this book Stephan Haggard and Robert Kaufman explore this relationship addressing a variety of questions What role have economic crises played in the current wave of political liberalization and democratization Can new democracies manage the daunting political challenges posed by economic reform Under what economic and institutional conditions is democracy most likely to be consolidated Drawing on contemporary political economy and the experiences of twelve Latin American and Asian countries they develop a new approach to understanding democratic transitions Haggard and Kaufman first analyze the relationship between economic crisis and authoritarian withdrawal and then examine how the economic and institutional legacies of authoritarian rule affect the capacity of new democratic governments to initiate and sustain economic policy reform Finally the authors analyze the consolidation of political and economic reform over the long run Throughout they emphasize the relationship between economic conditions the interests and power of contending social groups and the mediating role of representative institutions particularly political parties

Prospects for Constitutionalism in Post-Communist Countries Levent Gönenç, 2002-06-01 The last decade of the 20th century saw radical changes in Eastern Europe and the former USSR Most of these countries made a transition from totalitarianism or authoritarianism to democracy and from central planning to a market economy Adding to the latter a number of national entities gained their independence after the disintegration of the federative states of the USSR Yugoslavia and Czechoslovakia Many recent studies have focused on these double in some cases triple transitions and scholars from different fields analyzed the so called 1989 Revolution from different perspectives Rather less scholarly attention has been paid to the future of post communist constitutions and prospects for constitutionalism in these countries The main questions dealt with throughout this study can be formulated as follows Will liberal democratic constitutionalism take root in these countries Will new constitutions in Eastern Europe and the former USSR perish or survive This study also aims at contributing to the construction of a general constitutional theory by studying the causes and dynamics of constitutional change in general Such constitutional change is not only on the East European but also on the West European agenda The purpose of this study is not to introduce a general theory about constitutional in stability but studying post communist constitutions will help us to understand the causes and dynamics of constitutional change from a broader perspective
